NOTICES TO AIRMEN

SPECIAL NOTICES

AIR FORCES SPECIAL NOTICES

✓ AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Washington 25, D.C., ATTENTION: Flight Information Branch, Operations Division, Air Transport. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations officers is invited to AF Regulation 55-12 of February 20, 1948, subject, "Notices to Airmen", and to AF Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of August 28, 1947, USAF aircraft with destinations listed below or returning therefrom to the Unites States will clear through the stations indicated: AFRICA AND AZORES - Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass. ALASKA - McChord AFB, Wash.; or Great Falls AFB, Mont. BERMUDA - Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Fairfield-Suisun AFB, Calif. CANADA - Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C., Selfridge AFB, Mich.; or Westover AFB, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA - March AFB, Calif.; MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala. CARIBBEAN - Brookley AFB, Ala.; Kelly AFB, Tex.; or MacDill AFB, Fla. ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND - Washington National Airport, D.C.; or Westover AFB, Mass. NOVA SCOTIA AND NEWFOUNDLAND - Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; or Brookley AFB, Ala. HAWAII - Fairfield-Suisun AFB, Calif. EUROPEAN THEATER - Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	FREQUENCY	CHANNEL	FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy to USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3 or Pilots Handbook, USAF policy states that the "REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

OFFICIAL AIR FORCE FIELD DESIGNATIONS: The official names and designations of Air Force fields have been changed to new designations by the Department of the Air Force General Orders No. 2 of January 13, 1948. The abbreviation AF Aux. stands for Air Force Auxiliary Field and the abbreviation AFB is for Air Force Base.

POLICY ON CONTROL TOWER PROCEDURE: In the interest of decreasing communications load, the practice of tower traffic controller requesting information from incoming aircraft on highest rank aboard will be discontinued. This information will be included in transmission of flight plan over Plan 62 facilities. Other essential information not normally included in flight plan, such as indicating VIP's, will be noted in remarks column and similarly transmitted.

UNAUTHORIZED USE OF VHF EMERGENCY FREQUENCY (140.58 MC): The attention of all operations officers and pilots is invited to AF Letter 100-31, of January 13, 1948, subject as above.

DIRECT PHOT TO WEATHER FORECASTER COMMUNICATIONS SERVICE: Direct radio communication between military pilots and AWS weather forecasters is provided at locations and on frequencies given below. This service should be used only for those emergency occasions when the pilots consider direct communication with the weather forecaster is necessary for procurement of special weather data. In normal cases the weather sequences available from Airways Stations and Radio Range Stations is considered adequate.

Procedure: Establish contact with the Military Airways Station on the appropriate frequency and request connection to the weather forecaster:

Location	Frequency (VHF)
Langley Airways, Langley AFB	C
Tinker Airways, Tinker AFB	CAD
March Airways, March AFB	C

✓ CORRECTIONS AND CHANGES TO USAF A.N. 08-15-1: (1) Correct Canadian Data as follows: Argentia NAS, Nfld: Delete radio range guard on 3017.5, and show distance station to field for localizer as 3.9. Goose Bay, Lab.: Add VHF homer transmits and receives 140.58, operates on request. Dartmouth, N.S.: Add VHF Homer transmits and receives on 140.58, operates on req 0800-1530. Goose Bay, Lab.: Control twr operates on 116.1 in addition to freqs already published. St. Andrews, Nfld: Range guards 4495 in addition to freqs already published. Gander, Nfld: DF stn no longer operates on 8466, 8554, 11306. Gnd/air VOAC transmits on 363 and 5445 CW. Yarmouth, N.S.: Bear. and dist. stn to field: 197°, 4.9 mi. Windsor, Ont.: Bear. and dist. stn to field: 249°, 3.0 mi.

(2) Correct page 81, Pilot Procedures with Flight Service, Using USAF Military Flight Service Communications System (Plan 62), by amending paragraph 5 so that it reads as follows: "5. VFR Position Reports. When flying under VFR, pilots will make position reports wherever practicable to Military Airways stations enroute and receive any necessary advisories from Flight Service. One position report each 30 minutes is considered adequate. VFR position reports are not required by CAA Air Traffic Control".

(3) Correct page 115, List of Proper Voice Radio Procedure for Position Reporting

✓ Indicates new or revised Special Notices

Change of Flight Plan and Clearance from Non-USAF Bases, by changing B.1. so that it reads as follows: "1. Change of Altitude only; or Cancellation of Flight Plan." Change B.1. (7) so that it reads as follows: "(7) Remarks: IFR or VFR flight plan; or cancellation of flight plan requested."

(4) Correct pages 42,43, by showing ident of Bartlesville Arpt, Okla. as BVO.

(5) Correct page 43, by showing ident of Tulsa range as TUL.

(6) Correct pages 50 and 51, by showing ident of Valdosta, Ga. as VLD.

(7) Correct page 86, by showing hrs of oper of Hamilton AFB, Calif. as 0800-1700 Mon. thru Friday.

(8) Correct pages 89,90,94, by showing ident of Hobart, Okla VAR fac as HBR.

(9) Correct page 91, by showing correct spelling of Moosup.

(10) Correct page 94, by showing IFR min enroute alt on Red Arwy 68 (VHF) between Hudspeth and Culberson as 7500'.

(11) Correct page 49, by correcting listing of Humboldt to Lovelock, ident LOL.

(12) Correct page 60, by showing Cuddihy Field Twr oper 1130-1930, Thurs. through Tues., closed Wed.

(13) Correct page 43, by showing ident of Amarillo range as AMA.

(14) Correct page 28, under La Crosse, delete (Int) as La Crosse Int. Field abandoned and show field elev 653', bear. and dist from stn to field: 138°, 5.2 mi.

(15) Correct page 14, Grand Marais, by showing field elev as 838', bear. and dist. stn to field: 110°, 3.3 mi.

(16) Correct page 20, by showing OFACS at Everett (Paine) on 6557, 2976 and 11344 kc.

(17) Correct page 22, under Rentschler, by showing bear and dist stn to field: 1°,2.4.

(18) Correct page 23, by deleting Syracuse, N.Y. listing from middle of page, as field is now shown twice.

(19) Correct page 28, by showing Moline bear. and dist stn to field as 10.6 mi.

(20) Correct page 48, by showing Fallon (Freeman) dist, stn to field as 2.4 mi.

(21) Correct pages 58 and 59, by showing ident of Richmond as RIM.

(22) Correct page 86, by showing * in receives column for Clinton Co. AFB.

(23) Correct page 72, by showing Arcola range freq as 233 kc.

(24) Correct page 34, by showing call sign for Rapid City Arwys as AUW.

(25) Correct page 38, by deleting "(or CAD)" from pilot to forecaster service listing for Langley AFB.

(26) Correct page 48, by showing Mather AFB control twr as guarding 3105,4495,6210.

(27) Correct page 58, by deleting "(or C-A-D)" from pilot to forecaster service listing for Barksdale AFB.

(28) Correct page 68, by deleting "(or CAD)" from pilot to forecaster service listing for March AFB.

(29) Correct page 84, under listings of CW call by Calls, by showing station for AUW as Rapid City, pages 16-32, delete WXER, Rapid City, and insert: WXEN, Great Falls, page 16.

(30) Correct page 87, Kearney AFB, Nebr.; by showing * under Receives column; Marietta AFB, Ga., by showing GCA fac on operational status.

(31) Correct page 90, under Denver, Colo., by showing monitoring category as 2.

(32) Correct page 114, by adding Barksdale AFB on Channel C to notice re "Direct Pilot to Weather Forecaster Communications Service".

(33) Correct class for Hawkins (Jackson), Miss.: P54H-L6-S6.

(34) Correct page 81, by showing Olmsted Flight Service Center, Middletown, Pa., phone no.: Steelton 9891.

(35) Correct listing under Stirling (Trenton), Ont. VHF/DF is in operation on 126.18 mc. Operates 0730 to 1530.

✓ CORRECTIONS FOR USAF T.O. 08-15-3: (1) Correct Fairfield-Suisun AFB Chart, as follows: Time-Distance & Rate of Descent Stn to Field: 4.5 mi.; 110 mph, 2 min 27 sec, 204 fpm; 120 mph, 2 min 15 sec, 223 fpm; 130 mph, 2 min 4 sec, 240 fpm; 140 mph, 1 min 56 sec, 259 fpm; 150 mph, 1 min 48 sec, 281 fpm; 160 mph, 1 min 41 sec, 297 fpm.

(2) Correct Tucson Chart, by changing range freq. to 336 kc and by deleting Vail FM from cross-section of letdown (as this marker is on SE course).

(3) Correct Great Falls Chart, by showing radio range ident as GTF.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the CAA. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

✓ V.H.F. CHANNEL ASSIGNMENTS: To standardize the frequency and channel set-ups for VHF equipment in naval aircraft, the following assignments became effective July 1, 1948, unless otherwise directed by authorized commanders:

CHANNEL	FREQ.	PURPOSE	CHANNEL	FREQ.	PURPOSE
1-A	116.1	CAA stations	5-F	143.28	Tactical
2-B	142.74	Navy Towers	6-G	143.64	GCA
3-C	137.88	USAF Airways	7-H	142.02	GCA
Guard-D	140.58	Emergency	8	134.64	GCA
4-E	142.56	Tactical	9	126.18	USAF Towers

✓ RESTRICTIONS ON NAVAL AIRCRAFT AT LA GUARDIA FIELD, N.Y., NEW YORK INTERNATIONAL (IDLEWILD) AIRPORT, N.Y., AND NEWARK AIRPORT, N.J.: La Guardia Field, N.Y., New York International (Idlewild) Airport, N.Y., and Newark Airport, N.J., are closed to all Naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, of permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Federal Airways, Attention: A-45, Department of Commerce,

Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary conditions) carried in the Notices to Airmen section are coordinates (latitude and longitude).

AIRPORTS NOT TYPED AS "A" or "N" OPEN TO CIVIL AIRCRAFT: Air Force and Navy aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG) or (P) in the Directory of Airports section.

Civil airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment thereon. Those prefixed by (N) have a Navy (Air) servicing detachment thereon. Those prefixed by (P) have no such servicing detachments but are open to Department of Defense (Air Force, Navy, Army) aircraft.

Under the present Air Force expansion program, the Air Force is activating or re-activating such servicing detachments on a number of civil airports. Such installations on previously (P)-prefixed airports will occasion a prefix change from (P) to (A).

N.B. Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents an individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

CIVIL USAGE OF MILITARY FIELDS: USAF and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL USE OF MILITARY GCA UNITS: It must be recognized that, while Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the Commanding Officer of the fields having such units. CAA-established civil ceiling and visibility minimums of 400' and 1 mile respectively are mandatory, except in emergency.

REACTIVATION OF DANGER AREAS: Many new danger areas are being activated and the activity of existing ones is being intensified. Several recent near-accidents and complaints from Army, Air Force, and Navy installations about danger area violations serve to re-emphasize the importance of avoiding such areas.

With the cessation of war the majority of danger areas could be, and were, entered or flown over with impunity. Today this is no longer the case. Do not enter a danger area without prior permission! Be sure your charts spot all new areas!

USE OF AIRPORT UTILITY FREQUENCIES - 121.9 AND 121.7 MC: The airport ground control frequencies of 121.9 mc (standard civil channel) and 121.7 mc (alternate channel) are provided to eliminate the frequency congestion caused by numerous radio contacts between the tower and taxiing aircraft and the tower and airport utility vehicles thus providing a clear VHF channel for arriving and departing aircraft. The ground control frequency is used for the issuance of taxi information, clearances, and any other contacts between the tower and aircraft or vehicles operating on the airport.

Landing aircraft should guard the appropriate ground control frequency (normally 121.9 mc) as soon as the aircraft has cleared the active runway. At locations where a ground control frequency is not available or the aircraft is not equipped with the VHF ground control channel, the tower will handle all transmission to aircraft on the ground over its low frequency channel (278 kc or equivalent). Departing aircraft should communicate with the control tower on the appropriate ground control channel (121.9 or 121.7 mc) for taxi and clearance information and should remain tuned to that frequency until the pilot is ready to request take-off clearance. At that time, the pilot should communicate with the tower on the appropriate airborne VHF channel. Further communication with the tower, if necessary, should be made on the latter frequency. Aircraft not VHF equipped should guard the tower low frequency channel (278 kc or equivalent) for taxi information and take-off clearance.

V.H.F. IFR FLIGHTS: Until further notice, Air Traffic Control will be exercised on the assumption that aircraft are utilizing intermediate frequency radio ranges.

If a pilot desires to conduct IFR flight using VHF ranges over all or a portion of the route, his flight plan should so indicate. Further, flgts should not be conducted on civil arwys in IFR weather using VHF ranges unless the ATC clearances so authorize.

PRIVATE FLIER VHF FREQUENCIES: CAA Communications Stations and Towers grd the private flier frequencies of 122.1 mc for transmission to CAA Communications Stations and 122.5 mc for transmission to CAA operated towers.

CAA Communications Stations normally reply to itinerant aircraft on the voice feature of the range, low frequency or VHF, whichever is applicable. Replies are made on 111.1 mc if VHF reply has been requested on other than range frequency. CAA airport control towers will reply to itinerant aircraft on towers' low frequency or on one of the frequencies in the 118.3 to 121.3 mc band as cited in the "Transmitting Frequencies and Identifiers" listing on page VI.

RADIOTELEPHONE COMMUNICATIONS: The word ROGER in radiotelephone communications means "I have received all of your last transmission", and its use in any other sense by CAA stations and towers is not authorized. In order to avoid confusion it is suggested that pilots engaging in air-ground contacts also limit the use of ROGER to acknowledgment of transmissions.

Pilots enroute are requested to avoid, if possible, calling airway communications stations at or about 15 and 45 minutes past the hour (which are the scheduled broadcast times) to request weather information, as such calls may delay starting of scheduled broadcasts and cause inconvenience to other persons who are dependent on the broadcasts for weather reports.

VISUAL-AURAL RANGE (VAR) MONITORING: Only visual courses of VAR facilities are monitored continuously.

RADAR BEACONS: The radar beacon is an electronic beacon designed to serve as an aid to aircraft navigation for such aircraft as are equipped with proper radar equipment. Its purpose is somewhat similar to ordinary low frequency radio ranges, but radar beacons furnish more information. From a radar beacon signal, the radar operator of an aircraft can obtain both the range and azimuth of the beacon. The signal is also coded, so the particular beacon can be identified by reference to a chart or radar beacon list. Thus, the radar operator can obtain rapidly a navigational "fix". Microwave beacons transmit only when interrogated by a special radar pulse length reserved for this function alone.

The essential difference between a radar and a radar beacon is that, unlike the radar, which depends on a reflection of its own energy to determine the existence and position of an object, the radar beacon is made up of a receiver-transmitter combination which sends out a coded signal when actuated or "triggered" by a radar signal of the proper frequency in order to receive the radar beacon signals "triggered" by the radar set.

An advantage of radar beacon is that a single beacon in an area will enable aircraft to navigate under all weather conditions if fitted with the necessary radar interrogating equipment, and at a much greater range than radar alone.

"Racon List, Book I", Hydrographic Office Publication No. 520, gives location, code, operating agency, and all information necessary to use these radar beacons.

BONE-SHAPED (DUMB-BELL) FAN MARKERS: The bone-shaped fan markers have been commissioned primarily for approach control purposes as they provide a more definite holding pattern being only 1-1/2 miles wide through the center of the pattern instead of 3 miles as in the elliptical shaped fan marker. Eventually all approach control fan markers will be bone-shaped. In some cases fan markers taken over from other agencies, especially the Navy, are not used for approach control purposes even though they have the bone-shaped pattern which will be retained.

USE OF THE ILS GLIDE PATH: The glide path course is normally adjusted to 2.5° to 3° above the horizontal so that it intersects the middle marker at about 200 feet and the outer marker at about 1100' above the ground at touch-down point. In addition, to the desired path, all glide path facilities inherently produce five additional courses at high vertical angles (the lowest at approximately 16°).

The proper use of the glide path facility requires that the pilot maintain alertness as the glide path intersection is approached and interpret correctly the "fly-up" and "fly-down" instrumental indications to avoid the possibility of attempting to follow one of the higher angle courses.

Provided that procedures are correctly followed and fliers are properly indoctrinated in glide path instrumentation, the fact that these high angle courses exist should cause no difficulty in glide path navigation since they will not be encountered.

INSTRUMENT LANDING SYSTEM (ILS) APPROACHES: Pilots are requested to give advance information to Air Traffic Control when planning to make an ILS approach, upon reaching the reporting point preceding the holding fix at airport of intended landing. This will permit assignment to the proper holding pattern and eliminate unnecessary delays in landing. Failure to use this procedure, however, will not preclude the pilot's right to request an ILS approach after reaching the holding point if weather conditions or other factors make such request advisable.

INSTRUMENT APPROACH LIGHT SYSTEMS: Normally neon approach light systems will be operated regardless of the runway being used whenever the light intensity is equivalent to that between dusk and dawn, day or night, regardless of weather conditions or when otherwise necessary or requested.

PROCEDURE FOR INDICATING TEMPORARY LANDING AREA HAZARDS AT C.A.A. INTERMEDIATE FIELDS:

(A) When entire field is unsafe two red flags (days) and red double flashing warning lights (nights) will be prominently displayed from opposite corners of the beacon tower platform.

N.B. All normal fields markings, boundary, approach, obstructions lights, etc. will remain unchanged and will be lighted as usual.

(B) When a portion of the field is unsafe, 2 red flags (days) and red double flashing warning lights (nights) will be displayed from opposite corners of beacon tower. The usable landing area will be outlined with red flags and white lanterns with two white flags and two green lanterns at each end of usable runway indicating best approaches. The remainder of field (unusable portion) will be spotted with red flags. All normal field markings, boundary, obstruction, etc. will remain unchanged except green approach lights will be replaced with red approach lights.

(C) When a small portion of the field is unsafe, two red flags (days) and double red flashing warning lights (nights) will be displayed on opposite corners of beacon tower. Red flags and red lanterns will outline hazard area with several red flags and red lanterns within area.

(D) When one runway is unsafe, two red flags (days), two red lanterns (nights) will be displayed from opposite corners of beacon tower. The unsafe runway will be marked off from remainder of field by a row of red flags and a row of white lanterns with red flags and red lanterns spotted in unsafe area. Green lanterns will mark approach to shortened safe runway with normal green approach lights changed to clear. The green approach lights of unsafe runway will be replaced by red.

SEAPLANE FACILITY DIRECTORY: A Directory of Seaplane Facilities, listing all bases and anchorages on record with the CAA as of April 15, 1948, is available to seaplane owners and operators. Copies have already been distributed to all CAA-recorded seaplane facilities. Owners, or others having justifiable need for the directory, should address their requests to: Office of Aviation Information, Attention: A-258, CAA, Department of Commerce, Washington 25, D.C.

FLIGHT INFORMATION MANUAL USE OF "WRP" IN CLASSIFYING THREE-LETTER LOCATION IDENTIFIERS: The contraction "WRP", as used in Chapter I of the current Flight Information Manual, indicates merely a visual reporting point as distinguished from compulsory or non-compulsory reporting points, which are radio fixes). These WRPs (which should have been classified VRPs) were established at the request of the airlines for their own use.

FLIGHT INFORMATION MANUAL SUPPLEMENT: Flight Information Manual Supplement, dated April 15, 1948, supersedes in entirety Chapters XII and XIV of the January 1, 1948, Flight Information Manual. At the time the January 1, 1948, Manual went to press the Minimum Enroute Instrument Altitudes and Instrument Approach Procedures were being revised in accordance with the recommendations of the President's Special Safety Board. This Board raised minimums in many cases, and these revised minimums are all reflected in the Flight Information Manual Supplement of April 15, 1948.

THREE-LETTER IDENTIFIER KEYING CHANGE-OVER: Hereafter, the only notice in the Airman's Guide of the three-letter keying change-over will be the current listing of all identifiers indicated on Pages VI through IX.

✓ **AERONAUTICAL CHART AND PUBLICATION CORRECTIONS:** (1) Correct C & G S Radio Facility Chart 16, dated May 26, 1948, by showing Pocatello, Idaho tower receiving on 116.1 and 126.18 mc.

(2) Correct C & G S Radio Facility Chart 13A, dated June 16, 1948, by showing Providence, R. I. station also transmitting on 111.1 mc.

(3) Correct C & G S Radio Facility Chart 20, dated June 30, 1948, by showing the proper location identifier for Charleston, W.Va. as "CHW", with coding - . - . . . . .

✓ **ON-REQUEST REPORTING POINT:** The "MONROE" Intersection (intersection of the NE course of Newark and the NW course of Bridgeport radio ranges) has been designated an On-request (non-compulsory) reporting point.

✓ **AMENDMENTS TO PUBLISHED MINIMUM ENROUTE INSTRUMENT ALTITUDES:** Correct Minimum Enroute Altitudes, carried in the Flight Information Manual Supplement, dated April 15, 1948, as follows:

Airway:	Red 21	From:	Providence	To:	Squantum	Min.Alt.: 1700'
"	Amber 7	"	W.Palm Beach	"	Vero Beach	" 1500'
			Vero Beach	"	Melbourne	" 1200'

DIRECT ROUTES (Southeast United States)

From:	Columbia, S.C.	To:	Bold Springs, Ga. (Int)	Min.Alt.: 2000'
"	Columbia, S.C.	"	Greenville, S.C.	" 2400'
"	Augusta, Ga.	"	Greenville, S.C.	" 2400'

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Action Taken
Hot Springs, North Carolina	SW	Temporarily discontinued
Moon Island, Michigan	SW	Discontinued

(8-3-48)

AMENDMENTS TO PUBLISHED MINIMUM ENROUTE INSTRUMENT ALTITUDES: Correct Minimum Enroute Altitudes, carried in the Flight Information Manual Supplement, dated April 15, 1948, as follows:

Airway:		From:		To:		Min.Alt.:	
Amber 5		St. Louis		Advance			2000'
"	Amber 7	"	Relay (Int)	"	Lock Raven (Int)	"	1800'
"	Blue 42	"	Int E leg South Bend	"	Battle Creek	"	2000'
DIRECT ROUTES (SOUTHEAST UNITED STATES):							
		"	Chester, Tex.	"	Beaumont, Tex.	"	1600'
		"	Arcadia, La.	"	Zavalla, Tex.	"	1500'
		"	Pine Bluff, Ark. (VAR)	"	Int. SW leg Pine Bluff, Ark. & NE leg El Dorado, Ark.	"	1600'
		"	Int. SW leg Pine Bluff, Ark. & NE leg El Dorado, Ark.	"	El Dorado, Ark.	"	1500'
		"	Lubbock, Tex.	"	Tucumcari, N.M.	"	6500'
		"	Cuervo, Int.	"	Las Vegas, N.M.	"	9500'
		"	Amarillo, Tex.	"	Roswell, N. M.	"	7000'
		"	Roswell, N.M.	"	El Paso, Tex.	"	10,000'

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

ALABAMA: BIRMINGHAM ARPT: Rdo rcvr required days, transmitter and rcvr rqrd ngts. Sod unsafe when wet. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. No signal equip. avail. to indicate that clearance is needed for VFR opers at ngt when weather below minimums. (7-8)

CRAIG AFB (SELMA): Equip. on fld. (7-19)

DOTHAN-NAPIER FLD: Obst lgts atop 175' water tank 6 mi N inop. (3-23)

**FLORENCE, MUSCLE SHOALS SKYPARK SEAPLANE BASE: Correct lat. 34-50-30, long. 87-33-30. (7-16)

GAINESVILLE INT FLD: CLOSED (const)(7-22)

JASPER-WALKER CO. ARPT: Avoid new strip-being graded. (7-8)

MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)

MOBILE-RADIO: Auto. rng monitor. sys inop. (5-13)

MOBILE-BATES FLD: N/S rnwy lgts inop. Equip. on fld. No signal equip avail. to indicate that clearance is needed for VFR opers at ngt when weather below minimums. (5-26)

★MONTGOMERY-DANNELLY FLD-RADIO: CAA mobile twr avail. on 119.5 mc. Twr lctd about 50' in front of Admin Bldg. Grds 3105,4495,6210,3117.5 kc, 119.5 mc. Oper: 0700 to 1900. (7-19) FLD: Use rnwys only. NW taxi strip closed. Const NW portion fld and along S side NW/SE loading ramp. 65' unlgtd control twr under const 65' SW of rot. bcn. (7-21)

ARIZONA: DAVIS MONTHAN AFB (TUCSON): E fld closed-acft parked on rnwys. Former taxi strips 12R and 30L are now open as Rnwy 12R-30L, to be used by lgt acft days only. (5-18)

ARIZONA: DOUGLAS-RADIO: MRLW fac will be comm soon at lat 31-30-19.8, long. 109-39-20.4. Freq 379 kc, ident. "DUG". Courses: 50°, 120°, 230°, 300°. Var. 14° E. Bear. and dist, stn to fld: 120°, 3 mi. (5-17)

HOLBROOK INT FLD: Soon fld will be discont and thereafter the bcn, lgtd wind cone and bndry lgts will be installed and comm at the Holbrook Mun Arpt, 2 mi NNE. (6-7)

PHOENIX: Inst training on Phoenix Rng between 5500 and 9500'.

PHOENIX-SKY HARBOR ARPT: Ditch with dirt pile 100' E and 1000' N of S end N/S rnwy mrkd. (7-30)

ROOSEVELT-RADIO: Special purpose 2-course VFR Aural rng, privately owned will be comm on 110.7 mc soon, approx 10 mi W of Roosevelt at lat 33-41-00, long. 111-25-00. Call letters: "KAJE' Irregular hrs of oper, but chiefly during daylgt hrs. Freqs to be guarded 122.1,122.5 mc. Stn not to be used for navigation, and is for experimental purposes only. (5-17)

**TOLLESON-WILLIAMS ARPT: New fld. Lat. 33-29-45, long. 112-14-45. (3-19)

**WICKENBURG-FLYING E RANCH ARPT: New fld. Lat. 33-56-30, long. 112-47-30. (3-17)

WILLIAMS AFB (CHANDLER)-RADIO: USAF rng unreliable and to be used for training only. (2-3)

WILLIAMS ARPT: New strip being const. Equip. crossing NE/SW strip. (6-14)

★WINSLOW-RADIO: Voice fac comm on VHF visual-aural rng. Stn class: BVAR. Simul. bdcast comm on LF rng 266 kc and VHF rng 108.7 mc. (7-19) VHF rng stn grds 3105, 4405,6210,3117.5 kc, 116.1,122.1 mc. (7-22)

YUMA AUX NO. 1: E/W rnwy closed (fruit storage)(6-24)

YUMA AUX NO. 3: Macadam in piles along W side N/S rnwy. Width reduced to 1/2. (6-24)

ARKANSAS: BATESVILLE ARPT: N/S strip and E end E/W strip under const-unusable. Taxiway to fuel pump hazardous. (4-13)

**BERRYVILLE-MASCO ARPT: New fld. Lat 36-22-15, long. 93-35-15. (5-26)

BLYTHEVILLE ARPT: NE/SW rnwy, open ngts. Green course lgts flash. 2 dashes. (7-1)

BRINKLEY ARPT: NE/SW and SE end of NW/SE rnwys hazardous when wet. Ctn ngts.(7-13)

FORT SMITH ARPT: 100' E end E/W rnwy closed. (7-19)

HARRISON ARPT: CLOSED. (7-6)

**MOSCOW-LONG ARPT: New fld. Lat 34-08-45, long. 91-47-00. (4-20)

PINE BLUFF: Bombing practice being conducted 8 mi N within a circular area having a 3 mi radius, exclusive of Green Airway #5, centered at lat 34-21, long. 92-04. Activity began July 29 and will continue daily, Mon thru Fri., from 0800-1430, during VFR conditions only, up to 10,000', for a period of from 6 to 8 weeks. (7-30)

PINE BLUFF-GRIDER FLD: Use sod strips only, mrkd with alternate white and yellow mrkrs. Const on W and NW sides of fld. Closed ngts. (6-4)

SEARCY MUN ARPT: Const. (4-13)

CALIFORNIA: ALAMEDA NAS: Mntn high approach on Rnwys 26L and 21. Hvy acft parked these areas. 175' unlgtd cranes 2000' from NE corner fld-ctn ngts and during low visibility. Equip. adj to and on rnwys. Fld on positive control. (2-20)

BAKERSFIELD-KERN CO. ARPT: Temp drilling rig 135' high 5/8 mi SW of S end of Rnwy 16-34, mrkd. (6-15)

BURBANK-LOCKHEED AIR TERMINAL: Closed to all trans P-80 acft except on special projects for modification that stn. Right traffic Rnwys 7, 15. Approach lgts Rnwy 7 changed to red. Rnwy 13-31 closed (parked acft) (3-22)

**CAMBRIA ARPT: Correct lat. 35-33-15, long. 121-04-30. (7-29)

CASTLE AFB (MERCED): Use Rnwy 12-30 only-acft parked on landing mat. (5-18)

COALINGA ARPT: Equip on fld. Resurfacing NW/SE and NE/SW rnwys. (7-21)

COTATI OLF: Crash truck avail. at Santa Rosa NAAS on req. (10-3)

EL CAJON-GILLESPIE ARPT: Right traffic E take-offs, landings. (3-26)

EL CENTRO NAS: Avail. 0700 to 1800. Other hrs on 30 mins prior notice. (2-24)

★FAIRFIELD-SUISUN AFB-RADIO: USAF GCA fac operates 0800-2100; 30 min notice other hrs. (7-31). Too late for GCA page.

FRESNO AIR TERMINAL: Traffic pattern 800'. Use rnwys, taxi strips only. (6-23)

★HAMILTON AFB (SAN RAFAEL)-RADIO: USAF grnd/air stn opers on 2662 kc in addition to freqs previously published. (7-19) FLD: Extension to Rnwy 12 closed except in emerg. (5-20)

INYOKERN NAF-RADIO: FM on S course of Navy rng temp inop, ident will be changed to 3 dashes. (2-3)

JACKSON-AMADOR COUNTY ARPT: CLOSED (const). (7-13)

[redacted]: LONG BEACH ARPT-RADIO: Soon, compass lctr will be comm at middle mrkr site of CAA ILS. Freq. 254 kc, ident. "B". (5-13) FLD: Rnwy 12-30 closed. (6-17)

LOS ALAMITOS NAS (LONG BEACH)-RADIO: Navy twr now grds 4495, 6210 kc in addition to freqs previously published. Oper: 0800-1630. (7-30) FLD: Closed 1630 to 0800 except immemerg or by prior arrangment. (4-7)

LOS ANGELES ARPT-RADIO: About Aug 9, CAA ILS lclzr will be shut down until approx Sept 9. Voice and ident features will be added. (7-28) FLD: Unlgtd oil derricks on approach to Rnwy 34. E/W rnwy S side fld avail. taxiing only. All landings, take-offs and taxiing rstd to paved areas. Rnwy 4-22 closed. Equip. along S edge Rnwy 25R daylgt hrs. (7-21)

LOS ANGELES-CENTRAL ARPT-RADIO: June 17, Cl twr comm on 296 kc, 119.3 mc. Grds 3105 kc, 122.5 mc. Oper: 0800 to 2000 daily.

**LOS GATOS-AMES ARPT: Correct lat. 37-10-00, long 121-57-30. (7-19)

MARCH AFB (RIVERSIDE): Inten instrument flying training in AT-6 type acft days Mon thru Fri. (5-20)

MATHER AFB (SACRAMENTO): Use rnwys only-mat unserviceable. (5-18)

McCLELLAN AFB (SACRAMENTO): Rnwy 4-22 closed (parked acft). (5-19)

MERCED MUN ARPT: Equip. on fld 24 hrs at intersection taxi strips and Rnwy 30. (6-29)

MIRAMAR NAAS (SAN DIEGO)-RADIO: Navy twr now grds 3105, 6210 kc, 140.58, 142.74 mc. (7-30)

MOFFETT FLD NAS-LTA-HTA (MOUNTAIN VIEW): Fld on positive control. Multi-engine acft above JRB class use Rnwy 14L-32R only, except in emerg. N connecting taxiway closed to all traffic. (6-17)

MOJAVE NAS: CLOSED to all acft except on off. govt bus. (3-22)

MONTEREY PENINSULA ARPT: Right traffic Rnwys 24, 28. (3-26)

MUROC AFB-RADIO: Multiples are present on USAF rng (3-29) FLD: Lctd within a danger area. Closed to all trans acft except on written permission CG, Air Materiel Command. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to continue to fld. (1-30)

**NICE-CLEAR LAKE SEAPLANE BASE: ABANDONED. (7-19)

OAKLAND-RADIO: Auto. rng monitor. sys comm on SW course. (7-30)

OAKLAND ARPT: 2-way rdo rqrd. Rnwy 6-24 avail. lgt acft only. Hvy acft use rnwys, taxi strips only. Arpt channel closed to all seaplanes, LST craft moored in channel. (5-24)

ONTARIO INTERNATIONAL ARPT-RADIO: 121.5 mc transmitter and rcvr comm at Cl twr July 27.

POINT MUGU NAMTC-RADIO: Navy twr now grds 4495, 6210 kc in addition to freqs previously published. Oper: 0745-1630 Mon-Fri and on 30 mins notice. (7-30)

REAM NAAS (SAN YSIDRO)-RADIO: Navy twr now grds 4495, 6210 kc in addition to freqs previously published. Oper: 0745-1630 Mon-Fri and on 30 mins notice. (7-30) FLD: Closed to landing acft between 0800 to 1200 and 1230 to 1700 daily, rnwy repairs. Fld carrier landing practice may be conducted S half Rnwy 27 at any time. (7-3)

SACRAMENTO ARPT: Equip. on fld, days. (6-22)

SALTON SEA ARPT: Closed to all acft except on off. bus. E/W rnwy closed. (8-2)

SAN BERNARDINO AFB: Equip. on fld. (7-13)

SAN DIEGO-SPECIAL NOTICE: Pilots flying into Lower Calif., Mex, must have Mexican Consular clearance into Mexico prior to flgt. Pilots not securing prior consular clearance will have their acft impounded upon landing in Mexico. For complete Mexico entry procedures see " Flight Information Manual".

SAN DIEGO-LINDBERGH FLD: Right traffic Rnwys 27, 31. (1-29)

SAN DIEGO NAS-RADIO: Navy twr now grds 142.74 mc in addition to freqs previously published. (7-30) FLD: Traffic circle oval in shape with left turns at 800'. Landing will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1-1/2 mi S of Hotel Del Coronado. Multi-engine acft land on hvy duty rnwys, single-engine acft on asphalt mat. Maintain at least 1500' over Coronado, Amphibious Base, traffic lanes at North Island.

CANCELLED CHARTS

AL 327, 423

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with the prefix (AL); Instrument Landing System Charts, 5 cents each, by number with the prefix (ILS); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each, by number and with the suffix as in 22 DF; Local charts, 25 cents each, by name as Miami local; and Obstruction Plans, 40 cents each, by number with the prefix (OP). Consult the Dates of Latest Prints of Instrument Approach and Landing charts and Obstruction Plans for further information concerning these series of charts.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF FEDERAL AIRWAYS

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mc. Simplex service on 3117.5 kc will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations not suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

N.B. AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

(A)= **Air Force** Facility. G.P. = Glide Path. (L6) = High Intensity Lights. (W) = Without voice. (&) = On test basis, unmonitored and not to be used for navigation.

MMK's, **OMK's are at** the **same** locations **as** the middle and **outer** markers unless otherwise specified.

(5-17-48)

TRANSMITTING FREQUENCIES AND IDENTIFIERS

It must be remembered that practically all VHF omni-directional ranges (VOR) have not yet been formally commissioned and a great number of the VHF visual-aural ranges (VAR) are in the same status, being on test basis and not to be used for navigation. These on-test basis VHF ranges are indicated by a prefixed asterisk (*) in the following tabulation. (See Page IX for additional facilities)

LEGEND: * = Test basis-not to be used for navigation. (U) = Unmonitored, but usable for navigation. R = Low frequency range. VAR = VHF visual-aural range. VOR = VHF omni range.
H = Non-directional Radio Beacon (homing). T = Tower. - = Voice on 111.1 but not on 116.1 mc. + = voice on 111.1 and 116.1 mc.
T(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic.

VAR Monitoring Classification for Air Traffic Control Purposes: Category I = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. N.B. Category I indicated by parenthetical (1). Category II = If all except (D) of the conditions of Category I are met. N.B. Category II indicated by parenthetical (2). Category III = If facility monitored solely through use of an automatic visual course monitor and automatic transfer unit. Normally, VAR's which are not controlled by an INSAC and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. N.B. Category III indicated by parenthetical (3).

N.B. All C.A.A. communications stations guard 3105,4495,6210,3117.5 kc, and 122.1 mc, except in a few isolated cases. 3117.5 kc is not guarded by those communications stations operating in conjunction with C.A.A. towers. Some C.A.A. stations guard 116.1 mc, an AF frequency. All C.A.A. towers guard 3105,4495,6210,3117.5 kc, and 123.6 mc.

N.B. All C.A.A. communications stations guard 3105,4495,6210,3117.5 kc, and 122.1 mc, except in a few isolated cases. 3117.5 kc is not guarded by those communications stations operating in conjunction with C.A.A. towers. Some C.A.A. stations guard 116.1 mc, an AF frequency. All C.A.A. towers guard 3105,4495,6210,3117.5 kc, and 122.5 mc.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force
(N) " (with N in Type column) - Owned or leased totally by Navy
(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard
(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.
(N) " - Open to civilians but owned or leased wholly or in part by Navy
(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.
(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.
(P) " - Civil airport open to military aircraft. (See Note 2).
* " - C.A.A. Intermediate Field.

* Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A" or an "N" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

TYPE

A - U.S. Air Force
C - Commercial
CG - Coast Guard
I - Intermediate
M - Municipal
N - Navy
NG - National Guard
P - Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

(Sea Level Runway and Strip Requirements)

Class	Strip Length	Runway (Paved) Length
S-1	Less than 1800'	Less than 1800'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

N.B. Length (of longest runway) minus one-quarter of airport elevation equals effective sea level length.

RUNWAYS

In "longest" column is stated length of longest landing area in hundreds of feet. No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

h - landing area is hard-surfaced or paved
aw - allway field.
(26) - rnwy or strip length not verified by CAA

FACILITIES AND SERVICING

RADIO

R: Incomplete radio facilities (with voice availability), such as ILS, or tower and ILS only.
R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS.

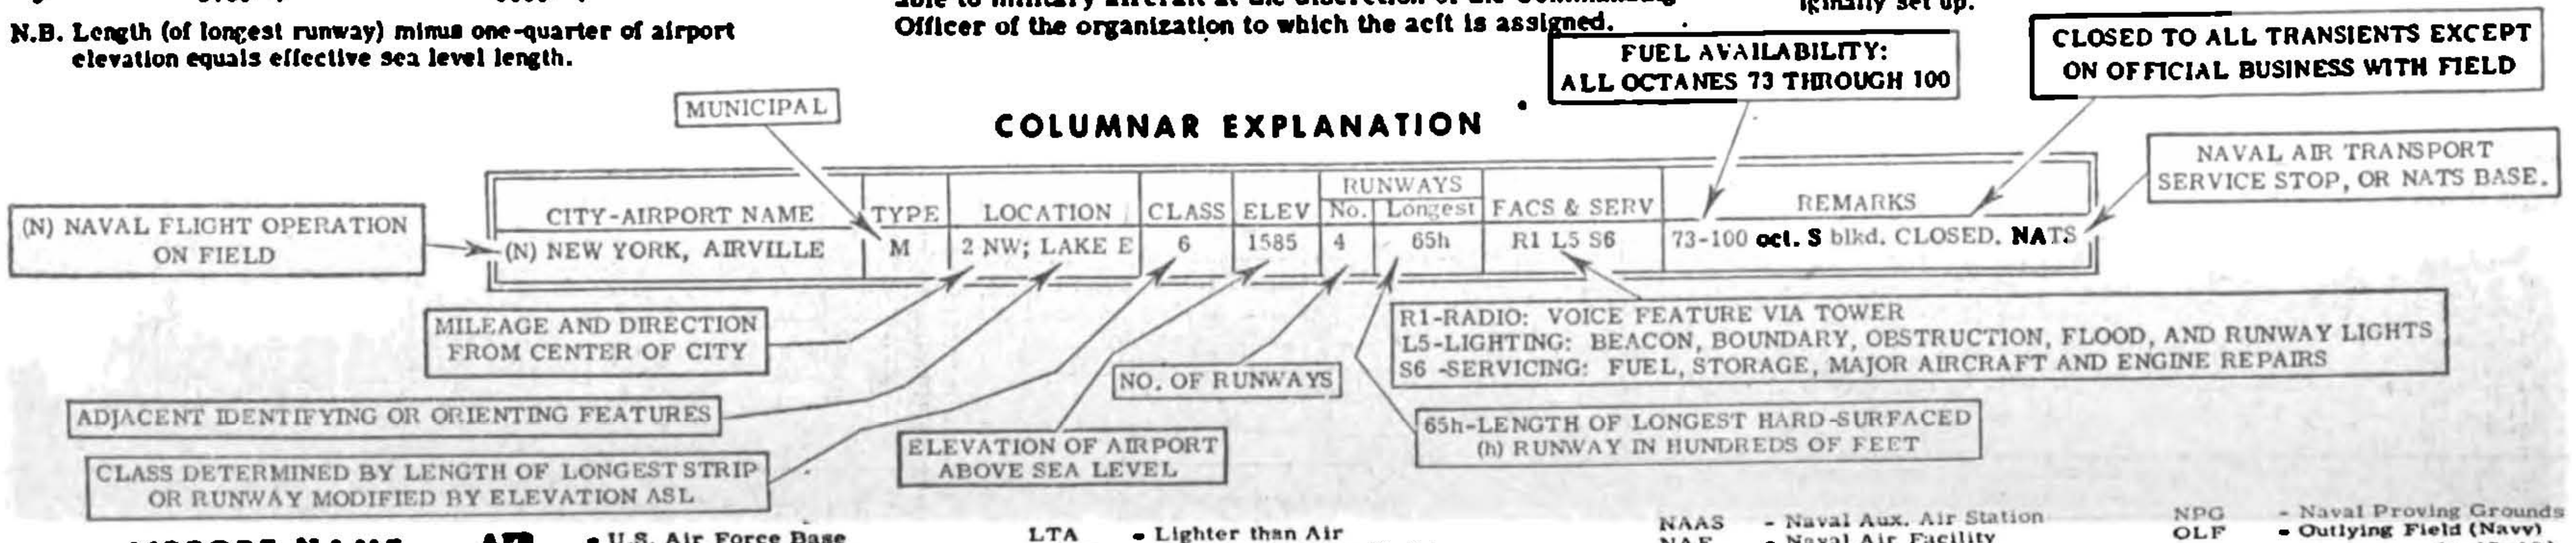
LIGHTS

L: Incomplete lighting, such as flood or strip lights, generally available only on prior request
L1: Beacon only
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway
(L5): Identical to L5 except rnwy lights are high intensity
L6: Beacon, bndry, obst, flood, rnwy, and instr appch
(L6): Identical to L6 except that appch lgts are high intensity
(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
(Any S combination in parenthesis indicates only part time or irregular attendant)
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS



(a) "91 oct" indicates fuel octanes available. "AF" or "Navy" preceding octane indicates USAF or Navy contract fuel available
(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.
(c) "Port. B-2 lgts" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway, or strips.
(d) "INACT-NO FACS." indicates USAF and/or Navy airfields used either exclusively by them or municipal airfields used jointly by them and civil interests at which both the USAF and/or the Navy and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the acft is assigned.
(e) "USAF and NAVY INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and/ or Navy and civil interests at which the USAF, or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is avail.
(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
(g) "Dcn and/or fld lgts on req" indicates lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the lights burn all night or will be turned on when a radio request is made or a plane circles the field.
(h) "FEE" indicates landing charges for revenue producing aircraft.

NOTES

1. ← Notam data revising previous issues.
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, STL-IND in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Since no servicing is available for transients no "S" combination is ever assigned these fields.
6. "BLKD" indicates approaches where glide angle to runway is 3:1 or less.
7. "(Formerly Air Force)" or "(Formerly Navy)": These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

** At the end of each state, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

COLUMNAR EXPLANATION

AIRPORT NAME ABBREVIATIONS

AFB - U.S. Air Force Base
CGAS - Coast Guard Air Station
LTA - Lighter than Air
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux. Air Facility
NAAS - Naval Aux. Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
NPG - Naval Proving Grounds
OLF - Outlying Field (Navy)

NOTICES TO AIRMEN

SPECIAL NOTICES

AIR FORCES SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Washington 25, D.C., ATTENTION: Flight Information Branch, Operations Division, Air Transport. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations officers is invited to AF Regulation 55-12 of February 20, 1948, subject, "Notices to Airmen", and to AF Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of August 28, 1947, USAF aircraft with destinations listed below or returning therefrom to the Unites States will clear through the stations indicated: AFRICA AND AZORES - Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass. ALASKA - McChord AFB, Wash.; or Great Falls AFB, Mont. BERMUDA - Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Fairfield-Suisun AFB, Calif. CANADA - Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C., Selfridge AFB, Mich.; or Westover AFB, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA - March AFB, Calif.; MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala. CARIBBEAN - Brookley AFB, Ala.; Kelly AFB, Tex.; or MacDill AFB, Fla. ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND - Washington National Airport, D.C.; or Westover AFB, Mass. NOVA SCOTIA AND NEWFOUNDLAND - Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; or Brookley AFB, Ala. HAWAII - Fairfield-Suisun AFB, Calif. EUROPEAN THEATER - Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	FREQUENCY	CHANNEL	FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy to USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 00-15-3 or Pilots Handbook, USAF policy states that the "REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

OFFICIAL AIR FORCE FIELD DESIGNATIONS: The official names and designations of Air Force fields have been changed to new designations by the Department of the Air Force General Orders No. 2 of January 13, 1948. The abbreviation AF Aux. stands for Air Force Auxiliary Field and the abbreviation AFB is for Air Force Base.

POLICY ON CONTROL TOWER PROCEDURE: In the interest of decreasing communications load, the practice of tower traffic controller requesting information from incoming aircraft on highest rank aboard will be discontinued. This information will be included in transmission of flight plan over Plan 62 facilities. Other essential information not normally included in flight plan, such as indicating VIP's, will be noted in remarks column and similarly transmitted.

UNAUTHORIZED USE OF VHF EMERGENCY FREQUENCY (140.58 MC): The attention of all operations officers and pilots is invited to AF Letter 100-31, of January 13, 1948, subject as above.

DIRECT PILOT TO WEATHER FORECASTER COMMUNICATIONS SERVICE: Direct radio communication between military pilots and AWS weather forecasters is provided at locations and on frequencies given below. This service should be used only for those emergency occasions when the pilots consider direct communication with the weather forecaster is necessary for procurement of special weather data. In normal cases the weather sequences available from Airways Stations and Radio Range Stations is considered adequate.

Procedure: Establish contact with the Military Airways Station on the appropriate frequency and request connection to the weather forecaster:

Location	Frequency (VHF)
Langley Airways, Langley AFB	C
Tinker Airways, Tinker AFB	CAD
March Airways, March AFB	C

✓ **CORRECTIONS AND CHANGES TO USAF A.N. 08-15-1:** (1) Correct remarks under New Orleans NAS, La., by deleting "AF contract fuel.". Under New Orleans (NG) add to remarks: "AF contract fuel".

(2) Correct Canadian data as follows: (a) Page 2, Nakina, Ont., class of radio range: BRAZ; (b) Page 3, Sioux Lookout, Ont., SW course realigned to 69°; Kenora, Ont. courses realigned as follows: 191°,275°,005°,087°; (c) Page 6, Goose Bay, Lab., VOAV now operates on 2912, 6543, 3485, 11306 kc, also 333 on req; (d) Page 10, Quebec, P.Q., bearing, station to field: 69°.

(3) Correct tabular pages under "Remarks", by amending channels listed thereon; i.e., the following notation should be deleted: "NOTE: Navy VHF Channels corresponding to USAF Chan, are indicated numerically with parenthesis, i.e., (1)=A, (9)=B, (3)=C"; and that the following be substituted therefor: "NOTE: USAF VHF Channels indicated by letters --Navy by figures in parenthesis: A(1)=116.1 mc. B(9)=126.18 mc. C(3)=137.88 mc. D=140.58 mc.(also Navy Gd). (2)=142.74 mc." (Correct Planning Chart, pages 82 and 83, by indicating thereon (outside map area, if necessary) the telephone numbers of Flight Service Centers.)

✓ Indicates new or revised Special Notices

(4) Correct listing under Grenier AFB, N.H., by showing VHF direction finder now operating on 140.58 and 139.32 mc.

✓ CORRECTIONS AND CHANGES TO USAF T.O. 08-15-2: (1) Correct AN-CPN-6(YM) Beacons (X-Band) Domestic information as follows: (a) Chincoteague, Va.-Code: 1-1-1-2. Hrs. of oper: Cont.; (b) Deer Island, Mass.-delete listing; (c) Willow Grove, Pa.-Code: 1-2-2. Add to remarks: Alt. 391'; (d) St. Joseph, Mo.-delete listing.

(2) Correct call letters of Portland, Ore. broadcasting station to KPOJ.

(3) Correct listing under Terre Haute, Ind., by adding: 1480 kc, WTHI; 1000 watts; location: 39-32-12, 87-25-25.

(4) Change power in watts of WMAZ at Macon, Ga., to 10,000 watts.

(5) Correct listing under Lewiston, Idaho, by adding: 1350 kc, KRLC; 1000 watts; location: 46-23-39, 116-59-40.

(6) Change New Orleans, La. listing by adding 690 kc, WWEZ; 1000 watts; location: 29-54-30, 90-02-26.

(7) Change power in watts of KUJ, Walla Walla, Wash., to 5000.

✓ REVISION TO USAF T.O. 08-15-03: Revise Instrument Approach Procedure for Randolph AFB, San Antonio, Texas, as follows: "If landing not accomplished or ground contact not established within 3 miles after passing range station make climbing right turn to 2500', avoiding building area, and proceed out NE leg at minimum enroute altitude".

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the CAA. In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

✓ V.H.F. CHANNEL ASSIGNMENTS: To standardize the frequency and channel set-ups for VHF equipment in naval aircraft, the following assignments became effective July 1, 1948, unless otherwise directed by authorized commanders:

CHANNEL	FREQ. (MC)	PURPOSE	CHANNEL	FREQ.(MC)	PURPOSE
A(1)	116.1	CAA stations	5-F		Tactical
(2)	142.74	Navy Twrs	6-G	143.64	GCA
C(3)	137.88	USAF Arwys	7-H	142.02	GCA
D (also Navy Grd)	140.58	Emergency	8	134.64	GCA
4-E		Tactical	B(9)	126.18	USAF Twrs

RESTRICTIONS ON NAVAL AIRCRAFT AT LA GUARDIA FIELD, N.Y., NEW YORK INTERNATIONAL (IDLEWILD) AIRPORT, N.Y., AND NEWARK AIRPORT, N.J.: La Guardia Field, N.Y., New York (Idlewild) International Airport, N.Y., and Newark Airport, N.J., are closed to all Naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout, servicing, lighting, of permanent obstructions of existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible, the items should be reported directly to the Office of Federal Airways, Attention: A-45, Department of Commerce, Washington 25, D. C.).

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary conditions) carried in the Notices to Airmen section are coordinates (latitude and longitude).

✓ AIRPORTS NOT TYPED AS "A" OR "N" OPEN TO CIVIL AIRCRAFT: Air Force and Navy aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG), or (P) in the Directory of Airports section.

Civil airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment thereon. Those prefixed by (N) have a Navy (Air) servicing detachment thereon. Those prefixed by (P) have no such servicing detachments but are open to National Defense (Air Force, Navy, Army, Coast Guard) aircraft.

Under the present Air Force expansion program, the Air Force is activating or re-activating such servicing detachments on a number of civil airports. Such installations on previously (P)-prefixed airports will occasion a prefix change from (P) to (A).

N.B. Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents an individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

CIVIL USAGE OF MILITARY FIELDS: USAF and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

(8-17-48)

CIVIL USE OF MILITARY GCA UNITS: It must be recognized that, while Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the Commanding Officer of the fields having such units, CAA-established civil ceiling and visibility minimums of 400' and 1 mile respectively are mandatory, except in emergency.

REACTIVATION OF DANGER AREAS: Many new danger areas are being activated and the activity of existing ones is being intensified. Several recent near-accidents and complaints from Army, Air Force, and Navy installations about danger area violations serve to re-emphasize the importance of avoiding such areas.

With the cessation of war the majority of danger areas could be, and were, entered or flown over with impunity. Today this is no longer the case. Do not enter a danger area without prior permission! Be sure your charts spot all new areas!

PROCEDURE FOR INDICATING TEMPORARY LANDING AREA HAZARDS AT CAA INTERMEDIATE FIELDS:

(a) When entire field is unsafe two red flags (days) and red double flashing warning lights (nights) will be prominently displayed from opposite corners of the beacon tower platform.

N.B. All normal field markings, boundary, approach, obstruction lights, etc. will remain unchanged and will be lighted as usual.

(b) When a portion of the field is unsafe, 2 red flags (days) and red double flashing warning lights (nights) will be displayed from opposite corners of beacon tower. The usable landing area will be outlined with red flags and white lanterns with two white flags and two green lanterns at each end of usable runway indicating best approaches. The remainder of field (unusable portion) will be spotted with red flags. All normal field markings, boundary, obstruction, etc., will remain unchanged except green approach lights will be replaced with red approach lights.

(c) When a small portion of the field is unsafe, two red flags (days) and double red flashing warning lights (nights) will be displayed on opposite corners of beacon tower. Red flags and red lanterns will outline hazard area with several red flags and red lanterns within area.

(d) When one runway is unsafe, two red flags (days) two red lanterns (nights) will be displayed from opposite corners of beacon tower. The unsafe runway will be marked off from remainder of field by a row of red flags and a row of white lanterns with red flags and red lanterns spotted in unsafe area. Green lanterns will makr approach to shortened safe runway with normal green approach lights changed to clear. The green approach lights of unsafe runway will be replaced by red.

SEAPLANE FACILITY DIRECTORY: A Directory of Seaplane Facilities, listing all bases and anchorages on record with the CAA as of April 15, 1948, is available to seaplane owners and operators. Copies have already been distributed to all CAA-recorded seaplane facilities. Owners, or others having justifiable need for the directory, should address their requests to: Office of Aviation Information, Attention: A-258, CAA, Department of Commerce, Washington 25, D. C.

✓ FLIGHT INFORMATION MANUAL, NEW ISSUE: The August 1, 1948, Flight Information Manual is now available and will be sent to all subscribers to the Airman's Guide.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: (1) Correct Boston Sectional Aeronautical Chart, dated July 21, 1948, by changing transmitting frequency for Quonset Point Tower from 272 kc to 227 kc.

(2) Correct Radio Facility Chart No. 9, by showing Custer, Mont. with a "green dot" as Custer is a compulsory reporting point along the airway

(3) Correct Flight Information Manual, dated August 1, 1948, by showing the correct location of Brawley, Calif. Standard Broadcast Station KROI as 2-1/4 mi NNE, ltd at lat. 33-01-40, long. 115-31-00; correct location of El Centro, Calif. Standard Broadcast Station KXO is ltd in city at lat. 32-47-13, long. 115-32-59.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Elev.	Action Taken
St. John, Ariz.	3- and 6-hourly			Discontinued
Elk City, Okla.	6-hourly			Discontinued
Modena, Utah	Pibals			Discontinued
Crescent City, Calif.	3- and 6-hourly			Discontinued
Point Sur, Calif.	3- and 6-hourly			Discontinued
Pine Bluff, Ark. (Toney Field)	SW			Discontinued
Tonopah, Nev.	Hourly			Discontinued
Willmar, Minn.	Hourly			To be discont. soon
Springerville, Ariz.	3- and 6-hourly	34-08,109-18		Inaugurated
Eagle Pass, Tex.	SW	28-52,100-31	878'	Inaugurated
Redwood Falls, Minn. (Redwood Falls Arpt)	Hourly	44-33, 95-05		To be avail. soon
Pine Bluff, Ark. (Grider Fld)	Hourly	34-11, 91-56	210'	To be avail. soon
Hobart, Okla. (Hobart Arpt)	Hourly	35-00, 99-03		Inaugurated
Milford, Utah	Pibals	38-25,113-01	5029'	Begun
Wausau, Wis. (Alexander Arpt)	SW	44-55, 89-37	1189'	To be avail. soon
Baraboo, Wis. (Bell-Baraboo Arpt)	SW	43-22, 89-46	980'	To be avail. soon
Clintonville, Wis. (Mun.Arpt)	SW	44-36, 88-45	828'	To be avail. soon
Hibbing, Minn. (Mun. Arpt)	SW			To be avail. soon
Oshkosh, Minn. (Winnebago Co. Arpt)	SW	44-00, 88-34	776'	To be avail. soon
Rhinelander, Wis. (Rhinelander-Oneida Co. Arpt)	SW	45-38, 89-27	1598'	To be avail. soon
Stevens Point, Wis. (Mun.Arpt)	SW	44-32, 89-31	1090'	To be avail. soon

NOTE: 3- and 6-hourly reports from Childress, Texas, will be discontinued effective upon inauguration of hourly reports from that location. Airway terminal forecasts now being prepared for New York International (Idlewild) Airport, New York, and Danville, Virginia.

AIRPORT AND RADIO NOTICES

LEGEND

** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

[redacted]:BIRMINGHAM ARPT: Rdo rcvr rqrd days, transmitter and rcvr rqrd ngts. Sod unsafe when wet. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. No signal equip. avail. to indicate that clearance is needed for VFR opers at ngt when weather below minimums. (7-8)
BROOKLEY AFB (MOBILE): Effect Aug 20, Rnwy 9-27 will be closed. (7-30)
CRAIG AFB (SELMA): Equip. on fld. (7-19)
DOTHAN-NAPIER FLD: Obst lgts atop 175' water tank 6 mi N inop. (3-23)
GAINESVILLE INT FLD: CLOSED (const). (7-22)
JASPER-WALKER CO. ARPT: Avoid new strip-being graded. (7-8)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)
MOBILE-RADIO: Auto. rng monitor. sys inop. (5-13)
MOBILE-BATES FLD: N/S rnwy lgts inop. Equip. on fld. No signal equip. avail. to indicate that clearance is needed for VFR opers at ngt when weather below minimums. (5-26)
MONTGOMERY-DANNELLY FLD: Use rnwys only. NW taxi strip closed. Const NW portion fld and along S side NW/SE loading ramp. 65' unlgtd control twr under const 65' SW of rot. bcn. (7-21)
[redacted]:DAVIS MONTHAN AFB (TUCSON): E fld closed-acft parked on rnwys. Former taxi strips 12R and 30L are now open as Rnwy 12R-30L, to be used by lgt acft days only. (5-18)
DOUGLAS-RADIO: MRLW fac will be comm soon at lat 31-30-19.8, long. 109-39-20.4. Freq 379 kc, ident. "DUG". Courses: 50°,120°,230°,300°. Var 14° E. Bear. and dist, stn to fld: 120°, 3 mi. (5-17)
★GILA BEND-RADIO: Adtnl VHF voice fac comm on 111.1 mc. (8-10) Stn now grds 3105,4495, 6210,3117.5 kc, 116.1,122.1 mc. (8-10)
HOLBROOK BCN SITE 51A, LAX-AMA: To be discont Aug 26, 1948. (8-12)
HOLBROOK INT FLD: Soon fld will be discont and thereafter the bcn, lgtd wind cone and bndry lgts will be installed and comm at the Holbrook Mun Arpt, 2 mi NNE. (6-7)
PHOENIX-Inst training on Phoenix Rng between 5500' and 9500'.
PHOENIX-SKY HARBOR ARPT: Ditch with dirt pile 100' E and 1000' N of S end N/S rnwy, mrkd. Parking ramp in front of terminal bldg and E/W taxi strip under repair, mrkd. (8-12)
ROOSEVELT-RADIO: Soon, special purpose 2-course VHF aural rng, privately owned will be comm on 110.7 mc, approx 10 mi W of Roosevelt at lat 33-41-00, long. 111-25-00. Call letters: "KAJE". Irregular hrs of oper, but chiefly during daylgt hrs. Freqs to be guarded 122.1,122.5 mc. Stn not to be used for navigation, and is for experimental purposes only. (5-17)
WILLIAMS AFB (CHANDLER)-RADIO: USAF rng unreliable and to be used for training only. (2-3)
WILLIAMS ARPT: New strip being const. Equip. crossing NE/SW strip. (6-14)
YUMA AUX NO. 1: E/W rnwy closed (fruit storage). (6-24)
YUMA AUX. NO. 3: Macadam in piles along W side N/S rnwy. Width reduced to 1/2. (6-24)
[redacted]:BATESVILLE ARPT: N/S strip and E end E/W strip under const-unusable. Taxiway to fuel pump hazardous. (4-13)
BLYTHEVILLE ARPT: NE/SW rnwy, open ngts. Green course lgts flash. 2 dashes. (7-1).
BRINKLEY ARPT: NE/SW and SE end of NW/SE rnwys hazardous when wet. Ctn ngts. (7-13)
FORT SMITH-RADIO: Soon, VHF omnirng will be placed in oper on an unmonitored, experimental basis. Not to be used for navigation. Freq 113.1 mc, ident. "FSM". Stn lctn: lat 35-23-09, long. 94-16-09. Elev 431' MSL. Var 8°E. Bear. and dist, stn to Fort Smith Arpt: 233°, 6 mi. Class: VORW. (8-5)
FORT SMITH ARPT: Equip. E end E/W rnwy, mrkd. (8-14)
HARRISON ARPT: CLOSED. (7-6)
PINE BLUFF: Bombing practice being conducted 8 mi N within a circular area having a 3 mi radius, exclusive of Green Airway No. 5, centered at lat 34-21, long. 92-04. Activity began July 29 and will continue daily, Mon thru Fri, from 0800 to 1430, during VFR conditions only, up to 10,000' for a period of from 6 to 8 weeks. (7-30)
PINE BLUFF-GRIDER FLD: Use sod strips only, mrkd with alternate white and yellow mrkrs. Const on W and NW sides of fld. Closed ngts. (6-4)
[redacted]:ALAMEDA NAS: Maintain high approach on Rnwys 26L and 21. Hvy acft parked these areas; 175' unlgtd cranes 2000' from NE corner fld-ctn ngts and during low visibility. Equip. adj to and on rnwys. Fld on positive control. (2-20)
BAKERSFIELD-KERN CO. ARPT: Temp drilling rig 125' high 5/8 mi. SW of S end of Rnwy 16-34, mrkd. (6-16)
[redacted]: BURBANK-LOCKHEED AIR TERMINAL: Closed to all trans P-80 acft except on special projects for modification that stn. Right traffic Rnwys 7, 15. Approach lgts Rnwy 7 changed to red. Rnwy 13-31 closed (parked acft). (3-22)
CASTLE AFB (MERCED): Three unlgtd 220' twrs Rdo Stn KYOS being erected 6 mi E (90° true) at lat 37-22-21, long. 120-27-24. (7-5) Use Rnwy 12-30 only-acft parked on landing mat. (5-18)
COALINGA ARPT: Equip. on fld. Resurfacing NW/SE and NE/SW rnwys. (7-21)
COTATI OLF: Crash truck avail. at Santa Rosa NAAS on req. (10-3)
**CULVER CITY ARPT: Correct lat 33-59-15, long. 118-24-00. (1-13)
EL CAJON-GILLESPIE ARPT: Right traffic E take-offs, landings. (3-26)
EL CENTRO NAS: Avail. 0700 to 1800. Other hrs on 30 minutes prior notice. (2-24)

CHARLESTON-KANAWHA CO. ARPT-RADIO: Middle mrkr compass lctr figt-checked and comm Aug 11. Placed in cont oper for test purposes. Will be formally comm about Aug 24. Lctd at lat 38-23-11, long. 81-34-38. Elev 800' MSL. Freq 227 kc, ident. "K". 0.63 mi from NE end NE/SW rnwy. This corrects Airgi Vol 3, No. 10. Erroneously comm as an MHW fac. (8-12) Fld: Equip. on fld days. (7-28)
CLARKSBURG-PATTON FLD: Right traffic on landings to the S. (8-5)
ELKINS-RADIO: Petersburg FM, lctd 44 mi E on the E course has been placed in oper on test basis, not to be used for navigation, ident. one dash. (5-29)
PETERSBURG-RADIO: Aug 16 to Oct 11, hourly weather observation will not be avail. for seq collection or radio bdcast during the hrs 2200 thru 0600 daily. (8-13)
SPENCER-ROANE CO. ARPT: CLOSED (const). (6-10)
WHEELING-OHIO CO. ARPT: Const N side W end E/W rnwy, mrkd. Equip. on fld days. (4-26)
WISCONSIN: BUTLER-CURTIS-WRIGHT ARPT: Closed ngts. (6-28)
CAMP McCOY: Temporary Danger Area estab for the period of July 10 to Aug 28, 1948. Area is being used daily for a gunnery range from the surface up to and including an alt of 20,000'. N boundary - lat 44-10; S boundary - lat 43-54; E boundary - long. 90-35; W boundary - long. 90-46.
EAU CLAIRE ARPT: Equip. on fld. Use rnwys only except in strong cross winds. (7-29)
★LA CROSSE-RADIO: Aug 11, VHF omnirng placed in oper on unattended, unmonitored test basis. Freq. 115.7 mc, ident. "LCE". Stn lctn: lat 43-49-33, long. 91-12-16, Elev 1272' MSL, Var 5°E. Class: VORW. Associated INSAC LaCrosse, Wisc.
MADISON ARPT: Equip. on fld days. Sod unsafe. (7-23)
MILWAUKEE-GENERAL MITCHELL FLD: Equip. on fld days. Right turn procedure rstd to locally based acft. New NNE/SSW rnwy 1-19 open days. Army twr lctd W side fld closed and should not be confused with CAA twr lctd N side fld. N/S cinder strip avail. lgt acft only. Tetrahedron uncontrollable, free swinging. (8-3)
MILWAUKEE-MAITLAND AIR STRIP: CLOSED. (8-13)
RHINELANDER ARPT: NE/SW rnwy closed (const). (8-9)
SHAWANO ARPT: 241' obst lgtd twr Rdo Stn WTCH being erected 4 mi WSW (259° true) at lat 44-46-47, long. 88-37-53. (7-1)
WAUKESHA CO. ARPT: Make first turns to left after landing and taxi on right side of strips to parking areas. Avoid landing or taxiing on soft area W side of N/S rnwy. (5-24)
WAUSAU-ALEXANDER ARPT: 392' obst lgtd twr erected 4.5 mi NNE (3° true) at lat. 44-58-58, long. 89-36-06. (7-9)
WEST BEND ARPT: Const in progress. NW/SE rnwy closed. Narrow strip alongside NW/SE rnwy for temp use. (7-30)
WYOMING: CASPER AFB: All rnwy lgts inop. except Rnwy 3-21. Oil well drilling 4 to 5 mi NE. Ctn in using Rnwy 3-21. (7-22)
CASPER-WARDELL FLD: Use rnwys, taxi strips only, bal fld rough. 40' unlgtd pole erected at 30 million candle pwr ceilometer projector 1000' N of hangar. (2-17)
CHEYENNE ARPT: Equip. on fld. Use rnwys, taxi strips during wet weather-shoulders soft. (2-20)
LARAMIE BCN SITE 36 SLC-OMA: Soon CAA will discontinue main and oper of bcn showing clear and green characteristic, and oper will be assumed by city. Bcn lctd, lat. 41-23.9, long. 105-40. (7-21)
LARAMIE-BREES FLD: Sod taxi strip running S from hangars closed. (4-22)
★ROCK SPRINGS-RADIO: Aug 2, simultaneous voice feature comm. All weather bdcasts on 290 kc will be made simultaneously on 114.7 mc. VHF rng class: BVOR.
SHERIDAN CO. ARPT: N/S rnwy unsafe hvy acft. Taxi strips parallel all rnwys except N/S rnwy and terminate at ramp. Equip. on fld intermittently. (2-23)
WHEATLAND-EASTSIDE ARPT: CLOSED (const). (6-28)

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY .

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Jacksonville	Mt. Whitney	WAC 467	FC 175
Lake of Woods	Orlando	WAC 468	FC 231
Miami	Reno	WAC 522	
Mobile	WAC 466	FC 9	

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with the prefix (AL); Instrument Landing System Charts, 5 cents each, by number with prefix (ILS); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each, by number and with the suffix as in 22 DF; Local charts, 25 cents each, by name as Miami local; and Obstruction Plans, 40 cents each, by number with the prefix (OP). Consult the Dates of Latest Prints of Instrument Approach and Landing charts and Obstruction Plans for further information concerning these series of charts.

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF FEDERAL AIRWAYS

GCA AVAILABLE: How and Where

GROUND CONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY AND NAVY. All GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency. To secure GCA assistance, pilots should first call the associated control tower.

In addition to the working frequencies listed below, Air Force and Navy GCA emergency VHF transmissions are made on 140.58 mc. Simplex service on 3117.5 kc will be provided at all Air Force and Navy installations to provide an alternate means of communications for scheduled air carrier aircraft. Army towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations not suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

N.B. AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

(A)= Air Force Facility. G.P. = Glide Path. (L6) = High Intensity Lights. (W) = Without voice. (&) = On test basis, unmonitored and not to be used for navigation.
MMK's, OMK's are at the same locations as the middle and outer markers unless otherwise specified.

(8-31-481)

TRANSMITTING FREQUENCIES AND IDENTIFIERS

It must be remembered that practically all VHF omni-directional ranges (VOR) have not yet been formally commissioned and a great number of the VHF visual-aural ranges (VAR) are in the same status, being on test basis and not to be used for navigation. These on-test basis VHF ranges are indicated by a prefixed asterisk (*) in the following tabulation. (See Page IX for additional facilities)

LEGEND: * = Test basis-not to be used for navigation. (U) = Unmonitored, but usable for navigation. R = Low frequency range. VAR = VHF visual-aural range. VOR = VHF omni range.
H = Non-directional Radio Beacon (homing). T = Tower. - = Voice on 111.1 but not on 116.1 mc. + = voice on 111.1 and 116.1 mc.
T(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic.

VAR Monitoring Classification for Air Traffic Control Purposes: Category I = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. N.B. Category I indicated by parenthetical (1). Category II = If all except (D) of the conditions of Category I are met. N.B. Category II indicated by parenthetical (2). Category III = If facility monitored solely through use of an automatic visual course monitor and automatic transfer unit. Normally, VAR's which are not controlled by an INSAC and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. N.B. Category III indicated by parenthetical (3).

N.B. All C.A.A. communications stations guard 3105,4495,6210,3117.5 kc, and 122.1 mc, except in a few isolated cases. 3117.5 kc is not guarded by those communications stations operating in conjunction with C.A.A. towers. Some C.A.A. stations guard 116.1 mc, an AF frequency. All C.A.A. towers guard 3105,4495,6210,3117.5 kc, and 122.5 mc.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force
(N) " (with N in Type column) - Owned or leased totally by Navy
(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard
(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.
(N) " - Open to civilians but owned or leased wholly or in part by Navy
(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.
(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.
(P) " - Civil airport open to military aircraft. (See Note 2).
* " - C.A.A. Intermediate Field.

* Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A" or an "N" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

TYPE

A - U.S. Air Force
C - Commercial
CG - Coast Guard
I - Intermediate
M - Municipal
N - Navy
NG - National Guard
P - Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

(Sea Level Runway and Strip Requirements)

Class	Strip Length	Runway (Paved) Length
S-1	Less than 1800'	Less than 1800'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

N.B. Length (of longest runway) minus one-quarter of airport elevation equals effective sea level length.

RUNWAYS

In "longest" column is stated length of longest landing area in hundreds of feet. No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

h - landing area is hard-surfaced or paved
aw - allway field.
(26) - runwy or strip length not verified by CAA

FACILITIES AND SERVICING

RADIO

R: Incomplete radio facilities (with voice availability), such as ILS, or tower and ILS only.
R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS

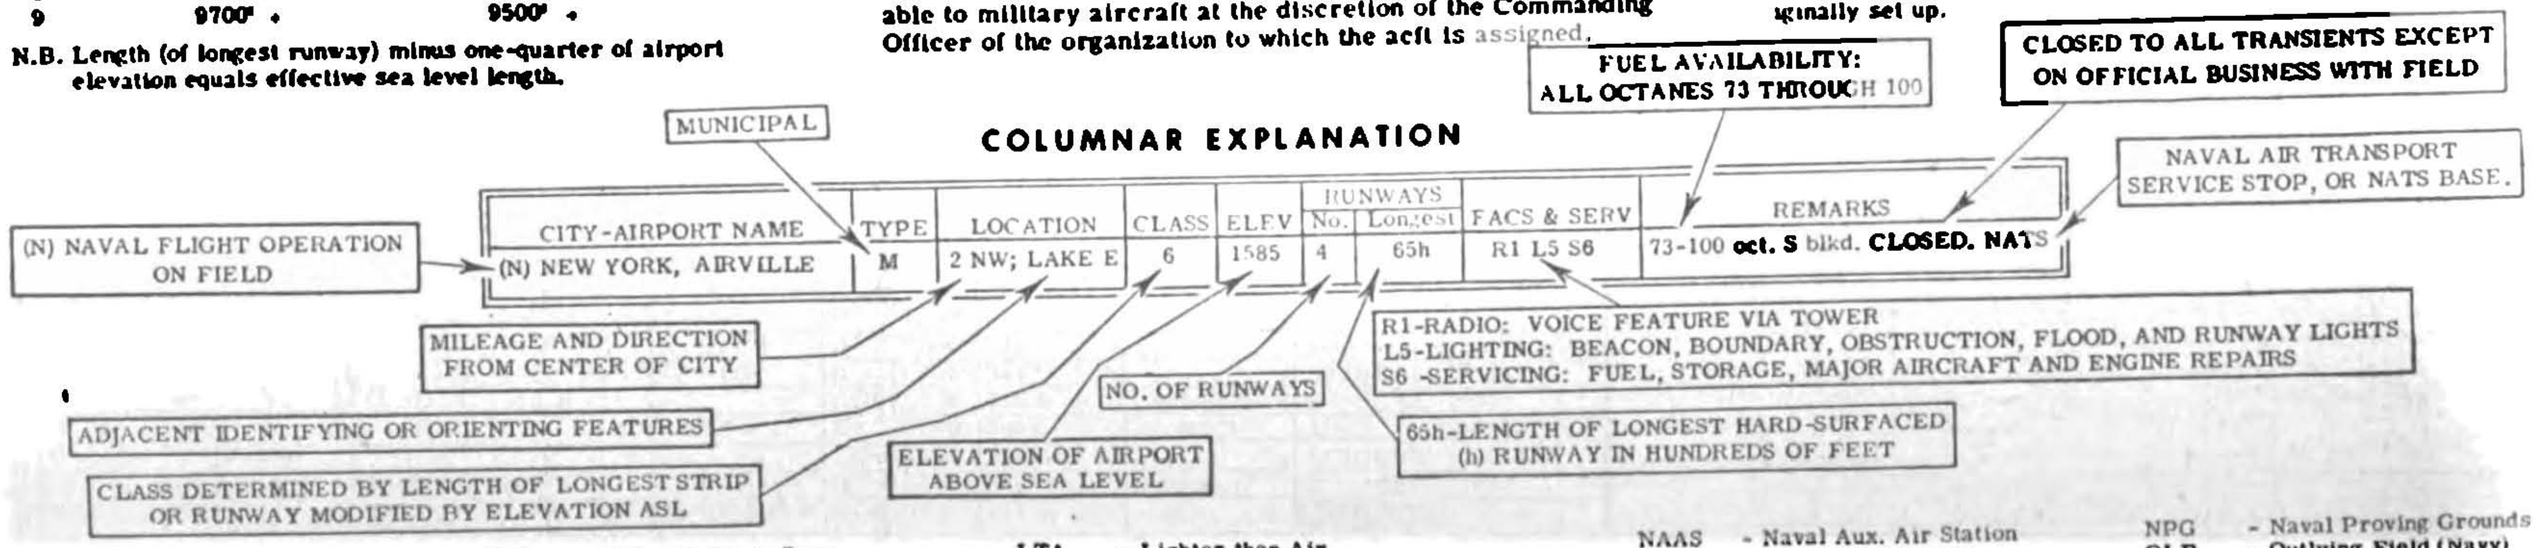
LIGHTS

L: Incomplete lighting, such as flood or strip lights, generally available only on prior request
L1: Rotating beacon only.
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway
(L5): Identical to L5 except runwy lights are high intensity
L6: Beacon, bndry, obst, flood, rnwy, and instr appch
(L6): Identical to L6 except that appch lgts are high intensity
(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage
(Any S combination in parenthesis indicates only part time or irregular attendant)
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS



(a) "91 oct" indicates fuel octanes available. "AF", or "Navy" preceding octane indicates USAF or Navy contract fuel available
(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.
(c) "Port. B-2 lgts" indicates cone-mounted lights outlining runways These lights are portable and may be shifted from runway to runway, or strips.
(d) "INACT-NO FACS." indicates USAF and/or Navy airfields used either exclusively by them or municipal airfields used jointly by them and civil interests at which both the USAF and/or the Navy and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the acft is assigned.
(e) "USAF and NAVY INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and/ or Navy and civil interests at which the USAF, or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is avail.
(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
(g) "Bcn and/or fld lgts on req" indicates lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column the lights burn all night or will be turned on when a radio request is made or a plane circles the field.
(h) "FEE" indicates landing charges for revenue producing aircraft.

NOTES

1. ← Notam data revising previous issues.
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army.
3. "*Effingham, 10, STL-IND in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Since no servicing is available for transients no "S" combination is ever assigned these fields.
6. "BLKD" indicates approaches where glide angle to runway is 3:1 or less.
7. "(Formerly Air Force)" or "(Formerly Navy)": These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

** At the end of each state, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

COLUMNAR EXPLANATION

AIRPORT NAME ABBREVIATIONS

AFB - U.S. Air Force Base
CGAS - Coast Guard Air Station
LTA - Lighter than Air
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux. Air Facility
NAAS - Naval Aux. Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
NPG - Naval Proving Grounds
OLF - Outlying Field (Navy)

NOTICES TO AIRMEN

SPECIAL NOTICES

AIR FORCES SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Washington 25, D.C., ATTENTION: Flight Information Branch, Operations Division, Air Transport. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations officers is invited to AF Regulation 55-12 of February 20, 1948, subject, "Notices to Airmen", and to AF Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of August 28, 1947, USAF aircraft with destinations listed below or returning therefrom to the Unites States will clear through the stations indicated: AFRICA AND AZORES - Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass. ALASKA - McChord AFB, Wash.; or Great Falls AFB, Mont. BERMUDA - Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Fairfield-Suisun AFB, Calif. CANADA - Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C., Selfridge AFB, Mich.; or Westover AFB, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA - March AFB, Calif.; MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala. CARIBBEAN - Brookley AFB, Ala.; Kelly AFB, Tex.; or MacDill AFB, Fla. ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND - Washington National Airport, D.C.; or Westover AFB, Mass. NOVA SCOTIA AND NEWFOUNDLAND - Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; or Brookley AFB, Ala. HAWAII - Fairfield-Suisun AFB, Calif. EUROPEAN THEATER - Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	FREQUENCY	CHANNEL	FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy to USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3 or Pilots Handbook, USAF policy states that the "REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

OFFICIAL AIR FORCE FIELD DESIGNATIONS: The official names and designations of Air Force fields have been changed to new designations by the Department of the Air Force General Orders No. 2 of January 13, 1948. The abbreviation AF Aux. stands for Air Force Auxiliary Field and the abbreviation AFB is for Air Force Base.

POLICY ON CONTROL TOWER PROCEDURE: In the interest of decreasing communications load, the practice of tower traffic controller requesting information from incoming aircraft on highest rank aboard will be discontinued. This information will be included in transmission of flight plan over Plan 62 facilities. Other essential information not normally included in flight plan, such as indicating VIP's, will be noted in remarks column and similarly transmitted.

UNAUTHORIZED USE OF VHF EMERGENCY FREQUENCY (140.58 MC): The attention of all operations officers and pilots is invited to AF Letter 100-31, of January 13, 1948, subject as above.

✓ **DIRECT PILOT TO WEATHER FORECASTER COMMUNICATIONS SERVICE:** Direct radio communication between military pilots and AWS weather forecasters is provided at locations and on frequencies given below. This service should be used only for those emergency occasions when the pilots consider direct communication with the weather forecaster is necessary for procurement of special weather data. In normal cases the weather sequences available from Airways Stations and Radio Range Stations is considered adequate.

Procedure: Establish contact with the Military Airways Station on the appropriate frequency and request connection to the weather forecaster:

Location	Frequency (VHF)
Langley Airways, Langley AFB	C
Tinker Airways, Tinker AFB	CAD
March Airways, March AFB	C
Barksdale Airways, Barksdale AFB	C

✓ **CORRECTIONS AND CHANGES TO USAF A.N. 08-15-1:** (1) Correct Directory of Airfields data as follows: Curry Co. (Denmark), SFO-SEA, Ore.-Change listing to "Curry Co. (Denmark); Cade AF Aux. (San Antonio), Tex.-Delete (N); Salt Falt, 8A, ELP-FTW, Tex.-delete remarks: P-lines S. E/W strip soft. N/S rough; Ephrata AFB, Wash.-add (A) to field designation.

(2) Correct page 40, by showing Idlewild (N.Y. International) Arpt Twr as transmitting on 239 kc and guarding 3105,3117.5,4495,6210 kc.

(3) Correct page 54, by showing Godman AFB range freq as 323 kc, and that range ground checked only and unreliable.

(4) Correct page 70, by showing Charlotte (Douglas), ILS on Channel X, with voice, mag. heading 50°, on test basis.

(5) Correct page 76, by showing class of Brownwood as HW.

(6) Correct pages 62, 63, by showing tower in operation at Holloman AFB, N.M., transmitting on 272 kc, 126.18 mc; guarding 3105,4495,6210 kc, 126.18 mc.

(7) Correct page 103, by showing danger area at Alamogordo with an R instead of C.

(8) Correct page 58, by showing Ream NAAS tower operating 0745-1630 Mon. thru

✓ Indicates new or revised Special Notices

Fri. and on 30 min. notice. San Diego NAS guarding (2) rather than D. (D listed under VHF column).

(9) Correct pages 111, 112, 113, 115, 117, 118, Table of Contents page, by deleting all references to "VHF range" and substituting therefor the designation "Visual Aural Range" where spelled out and "VAR" where abbreviations used.

(10) Correct page 119, Paragraph E, under Procedure for Ground Controlled Appch (GCA USAGE), so that it reads as follows: "E. WEATHER MINIMUMS: For Air Force Clearance purposes, weather minimums as prescribed below for Air Force fields in accordance with AF Reg. 60-16 will apply. Clearance to Navy Fields will be based upon the standard instrument letdown minimums or GCA minimums. These are the lowest at which a landing may be made except in emergency".

(11) Correct page 121, at bottom of Navy GCA data page, by deleting from the third footnote the following: "Not for clearance purposes".

(12) Correct page 122, by changing the listing of "Air Force Tmp Inact" near bottom of page (appearing twice) to "Air Force Inact"; and that listing of "Navy Tmp Inact" be changed to "Navy Inact."

(13) Correct page 119, by showing hrs of oper of Eglin GCA fac as Cont during IFR; 0900-1630 daily.

(14) Correct page 113, by showing VAR range at Winslow with guard on 3105, 4495, 3117.5, and 6210 kc.

(15) Correct Canadian data as follows: Page 7, Greenwood, N.S.-hrs of oper of control tower cont.; Page 10, St. Hubert RCAF, P.Q.-add VHF DF transmits & rec on 126.18 mc, oper 1300-2100 on req.; Quebec, P.Q.-VHF DF has been estab and is now in oper on 137.88 and 140.58 mc at Crystal One Airfield, Que., Canada, call: WYTL; Copper Lake, N.S.-Freq. of Copper Lake radio range has been changed from 206 to 233 kc.

(16) Correct page 54, by deleting reference to ILS under Winston-Salem (Smith Reynolds). This should be listed under Tri-City.

(17) Correct page 76, by showing San Marcos control tower guarding 3105, 4495, 6210 kc.

✓ CORRECTIONS TO USAF T.O. 08-15-3: Correct Dow AFB procedure to show minimum alt over field as 1000'.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D.C., for transmittal to the CAA.

In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

✓ V.H.F. CHANNEL ASSIGNMENTS: To standardize the frequency and channel set-ups for VHF equipment in naval aircraft, the following assignments became effective July 1, 1948, unless otherwise directed by authorized commanders:

CHANNEL	FREQ. (MC)	PURPOSE	CHANNEL	FREQ. (MC)	PURPOSE
A(1)	116.1	CAA 3tns	5-F		Tactical
B(2)	142.74	Navy Twrs	6-G	143.64	GCA
C(3)	137.88	USAF Arwys	7-H	142.02	GCA
Guard-D	140.58	Emergency	8	134.64	GCA
4-E		Tactical	9	126.18	USAF Twrs

RESTRICTIONS ON NAVAL AIRCRAFT AT LA GUARDIA FIELD, N.Y., NEW YORK INTERNATIONAL (IDLEWILD) AIRPORT, N.Y., AND NEWARK ARPT, N.J.: La Guardia Field, N.Y., New York International (Idlewild) Airport, N.Y., and Newark Arpt, N.J., are closed to all naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

✓ VFR FLIGHT PLANS: The Civil Aeronautics Administration urges you to file a flight plan prior to conducting a VFR cross-country flight. A flight plan may be filed with an Airway Communications Station or with a Weather Bureau Airport Station. Once you file a flight plan, follow it! When you land, close it with the nearest CAA communications station. VFR flight plans are handled for the primary purpose of enhancing search and rescue operations. So if you fail to close a flight plan you will become a false search and rescue incident and you may thus deprive someone who really needs assistance from getting it.

✓ S. C. 31 - "AIR TRAFFIC CONTROL": Copies of Radio Technical Commission for Aeronautics Special Committee 31 Report, "Air Traffic Control" are available at the RTCA Secretariat, Room 597, Old State Department Building, 17th and Pennsylvania Avenue, N.W., Washington 25, D. C.

✓ AERONAUTICAL CHART AND PUBLICATION CORRECTIONS: Correct C. & G.S. Radio Facility Charts as follows: (a) RF Chart No. 17: The minimum enroute altitude for instrument flight between Egbert and Kimball Intersections (reporting points) on Green Airway No. 3 is 7000'. (b) RF Chart No. 17: The minimum enroute altitude for instrument flight between Hill City and Waldo, Kans. Intersections on Red Airway No. 1 is 4000'. (c) RF Chart No. 17: The minimum enroute altitude for instrument flight between Denver-Hillsdale on Red Airway No. 31 is 8500'. (d) RF Chart No. 18: The control boundary between the Denver and Kansas City Control Areas is located 25 mi. NW of Waldo VAR on Red 1.

✓ FLIGHT INFORMATION MANUAL AMENDMENTS AND CORRECTIONS: Correct the August 1, 1948, Flight Information Manual as follows:

(1) Correct Chapter VII, Standard Broadcast Stations as follows:

(a) Page 89, under 1330 KC, change KALE Portland, Ore. to KPOJ and on page 106, under Oregon, change KALE to KPOJ.

(b) Page 110, correct data for Lynchburg, Va. WLVA as follows: 1230 kc; 250 watts; In city; lat 37-24-45, long. 79-10-09; Hgt: 176'; Type: A; Hrs of oper: 0600-0005.

(c) Page 103, add Butte, Mont., KOPR; 550 kc, Power day and night; 1000 watts, 3 WSW; lat. 45-58-30, long. 122-34-18; Hgt: 325'; Directional Night; Hrs of oper: 0600M to 2300M.

(d) Page 111, correct twr height of Parkersburg, W.Va., WPAR is 340'.

(e) Page 109, correct twr height of Ogden, Utah, KLO is 300'.

(f) Page 103, correct radio station KVER frequency of Albuquerque, N.M., to 1340 kc.

(g) Page 91, under 1400 KC., correct call letters for Maryville, Tenn., are WGAP instead of WGAY.

(2) Correct Chapter I, Airport Index with Location Identifiers as follows:

(a) Page 13, by adding Hill AFB, Ogden, Utah, Ident. HIF.

(b) Page 2, by deleting Alden, Iowa.

(c) Page 29, by deleting Wiese, Long Tree, Iowa.

(3) Correct Chapter II, Airport Locations By Latitude and Longitude as follows:

(a) Page 3., by showing chapter no. as II instead of X.

(b) Page 39, under Iowa, correct latitude and longitude as follows: Jefferson: 42-01-45, 94-23-00; Nora Springs: 43-08-15, 93-03-45; Shenandoah: 40-45-15, 95-23-15

(c) Page 58, under W. Va., South Parkersburg, Quinn's should be Guinn's.

(4) Correct Chapter XV, Instrument Approach Procedure as follows: Page 186, under Columbus, Ohio, Port Columbus Airport Procedure #1, the magnetic bearing station to airport is 84°.

(5) Correct Chapter XIV, Minimum Enroute Instrument Altitudes as follows: Page 174, under Southeast U.S. correct Min. Alt. of Winston Salem, N.C., to Tri-City, Tenn., to 7500'.

✓ A.T.C. AREA BOUNDARY DESIGNATION: Effective August 25, 1948, the N edge of Green Airway #5 was established as the boundary between the Washington and New York ATC Areas on Red Airway #72. (8-31-48)

V RELOCATION OF MEMPHIS-NEW ORLEANS CONTROL AREA BOUNDARY (CIVIL AIRWAY AMBER NO. 5): Effective October 15, 1948, the Memphis-New Orleans Control Area Boundary on Civil Airway Amber 5 will be relocated from its present location to 50 mi. S of Jackson, Miss. Concurrently, the Memphis-New Orleans Flight Advisory Area Boundary will be relocated as follows: From 25 mi W of Monroe, La. to 50 mi S of Jackson Miss., thence to a point 87-30 W long., and 32-00 N lat.

IX DESIGNATIONS AND REDESIGNATIONS OF CIVIL AIRWAYS, CONTROL ZONES, CONTROL AREAS AND CONTROL AREA EXTENSIONS: Effective August 25, 1948, Parts 600 and 601 of the Regulations of the Administrator were amended to read in part or in whole as follows:

CIVIL AIRWAYS:

(1) Green Airway #5 (Los Angeles, Calif., to Boston, Mass.). . . the intxn of the NE course of Gordonsville, Va., and the S course of Washington, D.C.; Brandywine, Md. rng stn; Millville, N.J. rng stn. . .

(2) Green Airway #7 (Nome, Alaska, to Fairbanks, Alaska). From Nome, Alaska rng stn; via the Moses Point, Alaska rng stn; the intxn of the E course of Moses Point, Alaska, and the N course of Unalakleet, Alaska; Galena, Alaska rng stn. . .

(3) Amber Airway #2 (Long Beach, Calif., to Point Barrow, Alaska). . . Fairbanks, Alaska range stn. From the intxn of the W course of Fairbanks, Alaska and the NW course of Nenana, Alaska, via Bettles, Alaska marker stn; Umiat, Alaska rng stn to Point Barrow, Alaska rng stn.

(4) Amber Airway #6 (Jacksonville, Fla., to U.S.-Canadian Border). . . Louisville, Ky. rng stn to Cincinnati, Ohio rng stn. From Columbus, Ohio rng stn. . .

(5) Red Airway #1 (Portland, Ore., to Kansas City, Mo.). . . Malad City, Idaho rng stn to Rock Springs, Wyo. rng stn. From the intxn of the NW course of Laramie, Wyo. . . . . Waldo, Kans. VHF rng stn; Salina, Kans. VHF rng stn; Topeka, Kans. VHF rng stn to the intxn of the E course of Topeka, Kans. VHF and the NW course of Kansas City, Mo.

(6) Red Airway #18 (Indianapolis, Ind., to Washington, D.C.). From the intxn of the NW course of Indianapolis, Ind., and the NW course of Cincinnati, Ohio, via Cincinnati, Ohio rng stn. . .

(7) Red Airway #27 (Knoxville, Tenn., to Detroit, Mich.). From Knoxville, Tenn. rng stn via a point lctd at lat 36-25 N and long. 83-50 W; Int of the N course of Lexington, Ky. VHF and the SW course of Cincinnati, Ohio; Dayton, Ohio rng stn; Toledo, Ohio rng stn to the intxn of the N course of Toledo, Ohio and the W course of Romulus, Mich.

(8) Red Airway #40 (Shemya, Alaska, to Anchorage, Alaska). . . Adak, Alaska rng stn. From Heiden, Alaska rng stn via the intxn of the W course of Kodiak, Alaska and the SE course of Naknek, Alaska; Kodiak, Alaska rng stn; the intxn of the N course of Kodiak, Alaska and the S course of Homer, Alaska, to Homer, Alaska rng stn. . .

(9) Red Airway #49 (Elko, Nev., to Ft. Bridger, Wyo.). . . Ft. Bridger, Wyo. rng stn to the intxn of the N course of Ft. Bridger, Wyo., and the SE course of Malad City, Idaho.

(10) Red Airway #70 (Lubbock, Tex., to Oklahoma City, Okla). From Lubbock, Tex. rng stn via Childress, Tex. VHF rng stn; Hobart, Okla. VHF rng stn to Oklahoma City, Okla rng stn.

(11) Red Airway #71 (Lubbock, Tex., to Wichita Falls, Tex.). From Lubbock, Tex. rng stn via the intxn of the E course of Lubbock, Tex. and the W course of Guthrie, Tex. VHF; Guthrie, Tex. VHF rng stn to the Wichita Falls, Tex. rng stn.

(12) Red Airway #72 (Millville, N.J., to Newark, N.J.). From the intxn of the SW course of Millville, N.J., and the S course of New Castle, Del, via New Castle, Del. rng stn to the intxn of the N course of New Castle, Del. and the W course of Philadelphia, Pa. From the intxn of the E course of Harrisburg, Pa. and the SW course of Willow Grove, Pa. via Willow Grove, Pa. to the intxn of the NE course of Willow Grove, Pa. and the E course of Allentown, Pa.

(13) Red Airway #73 (Baltimore, Md., to Millville, N.J.). From the intxn of the W course of New Castle, Del and the W course of Philadelphia, Pa. via New Castle, Del. rng stn to the intxn of the E course of New Castle, Del and the NE course of Millville, N.J.

(14) Red Airway #74 (Louisville, Ky., to Cincinnati, Ohio). From Louisville, Ky. rng stn via the intxn of the N course of Louisville, Ky. and a line 250° mag. from Covington, Ky. VOR rng stn to Covington, Ky. VOR rng stn.

(15) Blue Airway #9 (Columbia, Mo., to U.S.-Canadian Border). . . From Minneapolis, Minn., rng stn via Duluth, Minn. rng stn to the intxn of the SW course of Lakehead, Canada, and the U.S.-Canadian Border.

(16) Blue Airway #16 (Dillon, Mont., to Helena, Mont.). From Dillon, Mont., rng stn via Butte, Mont. rng stn to the intxn of the N course of Butte, Mont. and the E course of Drummond, Mont. From the intxn of the W course of Helena, Mont. and the SW course of Great Falls, Mont to the intxn of the SW course of Great Falls, Mont and the N course of Helena, Mont.

(17) Blue Airway #27 (Kodiak, Alaska to Kotzebue, Alaska). From the intxn of the W course of Kodiak, Alaska and the SE course of Naknek, Alaska via Naknek, Alaska rng stn; Bethel, Alaska rng stn and Nome, Alaska rng stn to Kotzebue, Alaska Airport.

(18) Blue Airway #32 (Seattle, Wash., to Fairbanks, Alaska). . . From Skwentna, Alaska rng stn via the intxn of the NE course of Skwentna, Alaska and the SW course of Summit, Alaska to Summit, Alaska rng stn.

(19) Blue Airway No. 57 (Elko, Nev., to Burley, Idaho). From the intxn of the NE course of Elko, Nev. and the W course of Lucin, Utah via the intxn of the NE course of Elko, Nev. and the SW course of Burley, Idaho to the intxn of the SW course of Burley, Idaho, and the N course of Lucin, Utah.

CONTROL ZONES:

(1) Denver, Colo.: Within a 10 mi. radius of Stapleton Field extending 2 mi. either side of the N course of Denver to Henderson FM.

(2) Sacramento, Calif.: Within a 5 mi radius of Sacramento Mun Arpt extending 2 mi either side of the SW course of Sacramento to a point 10 mi SW of the rng stn and within a 5 mi radius centered on McClellan Field and a 5 mi radius centered on Mather Field, and within 5 mi either side of a mag. course of 40° mag. (58° true) from Mather Field, extending for a distance of 12 mi from Mather Field and within the area inside of tangent lines drawn from the circumference of the 5 mi Sacramento Area to the circumference of the McClellan and Mather 5 mi areas.

(3) Mana, Kauai, T.H.: Within a 5 mi radius of Barking Sands Arpt extending 3 mi on the S side of the W course of Port Allen to Port Allen rng stn.

(4) Willmar, Minn.: Within a 5 mi. radius of Mun. Arpt extending 2 mi either side of the S course of Willmar to a point 10 mi S of rng stn.

(5) Whidbey Island, Wash.: Within a 5 mi radius of NAS (Ault Field) extending to and including a 5 mi radius of Whidbey Island Seaplane Base (Oak Harbor), Wash., excluding that portion lying within danger areas.

CONTROL AREAS:

(1) Amber Civil Airway #2 (Long Beach, Calif., to Point Barrow, Alaska): Those portions of Amber Arway #2 within the limits of the Continental U.S.; from Alaska-Canadian Border to Fairbanks, Alaska rng stn.

(2) Blue Airway #38 (Annette Island, Alaska, to U.S.-Canadian Border). From the intxn of the S course of Annette Island, Alaska and the U.S.-Canadian Border to a line extended across such airway through a point 50 mi N of Annette Island, Alaska rng stn. From a line extended at right angles across such airway through a point 50 mi SE of Gustavus, Alaska rng stn to U.S.-Canadian Border.

CONTROL AREA EXTENSIONS:

(1) Ft. Wayne, Ind.: From Ft. Wayne, Ind. rng stn extending 5 mi. either side of the SW course of Ft. Wayne, Ind. to a point 20 mi SW of Markle FM.

(2) Seattle, Wash.: From Seattle, Wash. rng stn extending 5 mi either side of a true bearing of 258° from rng stn to a point 25 mi from the rng stn.

(3) Eugene, Ore.: From Eugene, Ore. rng stn extending 5 mi either side of the W course of Eugene to a point 25 mi from the rng stn.

(4) Spokane, Wash.: From Geiger Field, Spokane, Wash. ILS lclzr extending 5 mi either side of the ILS lclzr course to a point 20 mi from the ILS lclzr.

(5) New York, N.Y.: From lat 40-39-50, long. 74-04-35, thence to lat 40-35-30, long. 74-08-00, thence to lat 40-35-50, long. 74-10-25, thence to a point of beginning.

(6) Willmar, Minn.: From Willmar, Minn. rng stn extending 5 mi either side of the S course of Willmar to a point 20 mi S of the rng stn.

V DESIGNATION AND REDESIGNATION OF COMPULSORY REPORTING POINTS: Effective September 1, 1948, Section 601.9 of the Regulations of the Administrator will be amended to read in part or in whole as follows:

(1) Green Airway #1 (U.S.-Canadian Border to Forest City, Me.). Millinocket, Me. rng stn; the intxn of the S course of Houlton, Me., and the W course of Blissville, N.B., Canada.

(2) Green Airway #2 (Seattle, Wash., to Boston, Mass.). . . Dickinson, N.D. rng stn; Bismarck, N.D. rng stn; Jamestown, N. D. rng stn; Fargo, N.D. rng stn. . .

(3) Green Airway #3 (San Francisco, Calif., to New York, N.Y.). San Francisco, Calif. rng stn; Oakland, Calif. rng stn; Bay Point, Calif. fan type rdo mrkr stn to the intxn of the NE course of Oakland, Calif. and the S course of Williams, Calif.; Sacramento, Calif. rng stn; Donner Summit, Calif. rng stn; Reno, Nev. rng stn; Humboldt, Nev. rng stn; Battle Mtn, Nev. rng stn; Elko, Nev. rng stn; Lucin, Utah rng stn; Ogden, Utah rng stn; Ft. Bridger, Wyo. rng stn; Rock Springs, Wyo. rng stn; Sinclair, Wyo. rng stn; Cheyenne, Wyo. rng stn; the intxn of the W course of Cheyenne, Wyo. and the SW course of Scottsbluff, Nebr; the intxn of the SE course of Scottsbluff, Nebr. and the W course of North Platte, Nebr.; North Platte, Nebr. rng stn; Grand Island, Nebr. rng stn; Omaha, Nebr. rng stn; Des Moines, Iowa rng stn; Moline, Ill. rng stn; the intxn of the SE course of Rockford, Ill. and the W course of Chicago, Ill.; Goshen, Ind. rng stn; Toledo, Ohio rng stn; the intxn of the SE course of Romulus, Mich. and the W course of Cleveland, Ohio; Cleveland, Ohio rng stn; Youngstown, Ohio rng stn; Philipsburg, Pa. rng stn; the intxn of the E course of Philipsburg, Pa. and the S course of Williamsport, Pa.; Allentown, Pa. rng stn; the intxn of the SW course of N.Y., N.Y. (La Guardia) and the NW course of Floyd Bennett, N.Y. (Navy); N.Y., N.Y. (La Guardia) rng stn.

(4) Green Airway #4 (Los Angeles, Calif., to Philadelphia, Pa.). . . Albuquerque, N.M., rng stn; the intxn of the E course of Otto, N.M. and the SW course of Las Vegas, N.M.; Tucumcari, N.M. rng stn.

(5) Green Airway #5 (Los Angeles, Calif., to Boston, Mass.). . .the intxn of the SW course of Boston, Mass. and the SE course of Hartford, Conn.; the intxn of the W course of Providence, R.I. and the SW course of Boston, Mass.

(6) Green Airway #6 (Laredo, Tex., to Norfolk, Va.). Laredo, Tex. rng stn; Alice, Tex. rng stn; Corpus Christi, Tex. rng stn. . . . . Richmond, Va. rng stn; Norfolk, Va. rng stn.

(7) Amber Airway #1 (U.S.-Mexican Border to Nome, Alaska). San Diego, Calif. rng stn; the intxn of the NW course of San Diego, Calif. and the SE course of Long Beach, Calif.; Bakersfield, Calif. rng stn. . .

(8) Amber Airway #2 (Long Beach, Calif. to Point Barrow, Alaska). Las Vegas, Nev. rng stn; Enterprise, Utah rng stn; Delta, Utah rng stn; Salt Lake City, Utah rng stn; Malad City, Idaho rng stn; Pocatello, Idaho rng stn; DuBois, Idaho rng stn; Dillon, Mont. rng stn; Whitehall, Mont rng stn; Great Falls, Mont. rng stn; Cut Bank, Mont. rng stn; the intxn of the NW course of Northway, Alaska and the NE course of Tanacross, Alaska; Big Delta, Alaska rng stn; the intxn of the NW course of Big Delta, Alaska and the E course of Fairbanks, Alaska.

(9) Amber Airway #3 (El Paso, Tex., to Great Falls, Mont.). Eagle, N.M. rng stn; Las Vegas, N.M. rng stn. . .

(10) Amber Airway #4 (Brownsville, Tex., to Minot, N.D.). Brownsville, Tex. rng stn.; the intxn of the N course of Alice, Tex. and the S course of Alamo (San Antonio), Tex. Alamo (San Antonio), Tex. rng stn; Cibolo, Tex. fan type rdo mrkr stn or the intxn of the N course of Alamo (San Antonio), Tex. and the SW course of Austin, Tex.; Austin, Tex. rng stn; Waco, Tex. rng stn; the intxn of the S course of Ft. Worth, Tex. and the W course of Dallas, Tex.; Oklahoma City, Okla rng stn; Tulsa, Okla rng stn; Chanute, Kans. rng stn; St. Joseph, Mo. rng stn; Sioux City, Iowa rng stn; Sioux Falls, S.D. rng stn; Huron, S.D. rng stn; Aberdeen, S.D. rng stn; Minot, N.D. rng stn.

(11) Amber Airway #5 (New Orleans, La., to Milwaukee, Wis.)... the intxn of the E course of Peoria, Ill. and the SW course of Joliet, Ill.; Joliet, Ill. rng stn.

(12) Amber Airway #6 (Jacksonville, Fla. to U.S.-Canadian Border). . . Louisville, Ky. rng stn; Dayton, Ohio rng stn.

(13) Amber Airway #7 (Key West, Fla., to Caribou, Me.). Key West, Fla. rng stn; Miami, Fla. rng stn; West Palm Beach, Fla. rng stn; Melbourne, Fla. rng stn; Daytona Beach Fla. rng stn; Savannah, Ga. rng stn; Charleston, S.C. rng stn; Florence, S.C. rng stn; Raleigh N.C. rng stn; the intxn of the SW course of Richmond, Va. and the SE course of Blackstone, Va.; Washington, D.C. rng stn; the intxn of the NE course of Washington, D.C., and the W course of Baltimore, Md.; Newark, N.J. rng stn; Hartford, Conn. rng stn; Portland, Me. rng stn; Augusta, Me. rng stn; Bangor, Me. rng stn; Presque Isle, Me. rng stn.

(14) Amber Airway #9 (Charleston, S.C., to Norfolk, Va.). Myrtle Beach, S.C. VHF rng stn; Wilmington, N.C. VHF rng stn; New Bern, N.C. VHF rng stn; Williamston, N.C. VHF rng stn; the intxn of the NE course of Williamston, N.C. VHF and the SW course of Norfolk, Va.

(15) Red Airway #6 (Las Vegas, Nev., to Omaha, Nebr.). St. George, Utah VHF rng stn; Bryce Canyon, Utah VHF rng stn; Hanksville, Utah VHF rng stn; Grand Junction, Colo. VHF rng stn; Eagle, Colo. VHF rng stn; Akron, Colo. rng stn; Hayes Center, Nebr. rng stn; Lincoln, Nebr. rng stn.

(16) Red Airway #8 (Altoona, Pa., to Wilkes-Barre, Pa.). Williamsport, Pa. rng stn.

(17) Red Airway #10 (Pueblo, Colo., to Charleston, S.C.). The intxn of the SW course of La Junta, Colo. and the NE course of Trinidad, Colo.; Dalhart, Tex. VHF rng stn; Wichita Falls, Tex. rng stn; Dallas, Tex. rng stn; the intxn of the NW course of Tyler, Tex. and the E course of Dallas, Tex.; the intxn of the NE course of Tyler, Tex. and the W course of Shreveport, La.; Shreveport, La. rng stn; Monroe, La. rng stn; Meriden, Miss. rng stn; Birmingham, Ala. rng stn; Augusta, Ga. rng stn.

(18) Red Airway #11 (Tulsa, Okla. to Boston, Mass.). The intxn of the S course of Joplin, Mo. and the NE course of Tulsa, Okla; Springfield, Mo. rng stn; Vichy, Mo. rng stn; the intxn of the NE course of Scott Field, Belleville, Ill. and the NW course of Evansville, Ind.; Evansville, Ind. rng stn; Huntington, W.Va. rng stn; Elmira, N.Y. rng stn; the intxn of the NE course of Westover Field, Chicopee Falls, Mass. and the W course of Boston, Mass.; the intxn of the E course of Boston, Mass. and the NE course of Squantum, Mass. (Navy) rng.

(19) Red Airway #12 (Kansas City, Mo., to Detroit, Mich.). Kirksville, Mo. rng stn; Burlington, Iowa rng stn; South Bend, Ind. rng stn; the intxn of the SE course of Lansing, Mich. and the W course of Romulus, Mich.

(20) Red Airway #13 (Sunbury, Pa., to Boston, Mass.). Wilkes-Barre, Pa. rng stn; New Hackensack, N.Y. rng stn; Providence, R.I. rng stn.

(21) Red Airway #14 (Lone Rock, Wis., to Louisville, Ky.). Rockford, Ill. rng stn; Chicago, Ill. rng stn; the intxn of the E course of Harvey, Ill and the SE course of Chicago, Ill.

(22) Red Airway #17 (Ft. Wayne, Ind., to Baltimore, Md.). Ft. Wayne, Ind. rng stn; Findlay, Ohio, non-directional rdo bcn; Mansfield, Ohio, non-directional rdo bcn; Martinsburg, W.Va. rng stn; the intxn of the NE course of Arcola, Va. and the W course of Baltimore, Md.; Baltimore, Md. rng stn.

(23) Red Airway #18 (Indianapolis, Ind., to Washington, D.C.). Cincinnati, Ohio rng stn; Charleston, W.Va. rng stn; Elkins, W. Va. rng stn; Front Royal, Va. rng stn.

(24) Red Airway #19 (Washington, D.C., to Grand Rapids, Mich.). Morgantown, W.Va. rng stn.

(25) Red Airway #21 (Lansing, Mich., to Boston, Mass.). The intxn of the S course of Youngstown, Ohio and the NW course of Pittsburgh, Pa.; the intxn of the NE course of Pittsburgh, Pa. and the N course of Altoona, Pa.; the intxn of the NE course of Allentown, Pa. and the W course of Newark, N.J.

(26) Red Airway #22 (U.S.-Canadian Border to Rochester, N.Y.). The intxn of the NE course of Buffalo, N.Y. and the NW course of Rochester, N.Y.

(27) Red Airway #23 (U.S.-Canadian Border to N.Y., N.Y.)/ The intxn of the NE course of Allentown, Pa. and the NW course of N.Y. (La Guardia), N.Y.; the intxn of the SW course of New Hackensack, N.Y. and the NW course of New York (La Guardia), N.Y.

(28) Red Airway #25 (Tallahassee, Fla., to Miami, Fla.). Cross City, Fla. rng stn; Tampa, Fla. rng stn; Ft. Myers, Fla. rng stn.

(29) Red Airway #26 (Syracuse, N.Y., to N.Y., N.Y.). The intxn of the SE course of Elmira, N.Y. and the N course of Wilkes-Barre, Pa.

(30) Red Airway #29 (Rochester, N.Y., to Baltimore, Md.). No reporting point designation.

(31) Red Airway #31 (Denver, Colo., to Minneapolis, Minn.). Scottsbluff, Nebr. rng stn; Pierre, S.D. rng stn; Watertown, S.D. rng stn; Willmar, Minn. rng stn.

(32) Red Airway #32 (Laredo, Tex., to Houston, Tex.). San Antonio, Tex. (Kelly) rng stn.

(33) Red Airway #33 (Richmond, Va., to New Hackensack, N.Y.). Arcola, Va., rng stn.

(34) Red Airway #34 (Pulaski, Va., to Elizabeth City, N.C.). Rocky Mount, N.C. VHF rng stn; Elizabeth City, N.C. VHF rng stn.

(35) Red Airway #37 (Dallas, Tex., to Washington, D.C.). Tyler, Tex. rng stn; Little Rock, Ark. rng stn; Lynchburg, Va. rng stn.

(36) Red Airway #38 (Big Spring, Tex., to San Antonio, Tex.). San Angelo, Tex. rng stn; the intxn of the NW course of San Antonio, Tex. (Kelly) and the W course of San Antonio (Alamo), Tex.

(37) Red Airway #53 (Joplin, Mo., to Springfield, Mo.). Joplin, Mo. rng stn.
(38) Red Airway #57 (Moline, Ill., to Toledo, Ohio). Battle Creek, Mich. rng stn.
(39) Red Airway #58 (Salinas, Calif., to Hollister, Calif.). No reporting point designation.
(40) Red Airway #59 (Toledo, Ohio, to U.S.-Canadian Border). No reporting point designation.
(41) Red Airway #61 (Pittsburgh, Pa., to Washington, D.C.). No reporting point designation.
(42) Red Airway #63 (Battle Creek, Mich., to U.S.-Canadian Border). Salem, Mich. VHF rng stn.
(43) Red Airway #64 (U.S.-Canadian Border to Annette Island, Alaska). No reporting point designation.
(44) Red Airway #65 (Oceanside; Calif., to Blythe, Calif.). No reporting point designation.
(45) Red Airway #66 (Santa Barbara, Calif., to Los Angeles, Calif.). No reporting point designation.
(46) Red Airway #67 (Crestview, Fla., to Dothan, Ala.). Dothan, Ala. rng stn.
(47) Red Airway #68 (El Paso, Tex., to Ft. Worth, Tex.). The intxn of the S course of El Paso, Tex. and the W course of Hudspeth, Tex. VHF; the intxn of the SW course of Midland, Tex. and the SE course of Wink, Tex. VHF; Midland, Tex. rng stn.
(48) Red Airway #70 (Lubbock, Tex., to Oklahoma City, Okla). Childress, Tex. VHF rng stn; Hobart, Okla. VHF rng stn.
(49) Red Airway #71 (Lubbock, Tex., to Wichita Falls, Tex.). Guthrie, Tex. VHF rng stn.
(50) Blue Airway #1 (Pendleton, Ore. to Spokane, Wash.). Walla Walla, Wash. rng stn
(51) Blue Airway #2 (Birmingham, Ala., to Erie, Pa.). Erie, Pa. rng stn.
(52) Blue Airway #3 (Mobile, Ala., to Lafayette, Ind.). Pensacola, Fla. rng stn.
(53) Blue Airway #5 (Galveston, Tex., to Wichita, Kans.). Galveston, Tex. rng stn; the intxn of the NW course of Houston, Tex. and the NE course of Richmond, Tex.; Bryan, Tex. rng stn.
(54) Blue Airway #7 (Paso Robles, Calif., to Hamilton Field, Calif.). No reporting point designation.
(55) Blue Airway #8 (Fargo, N.D., to United States-Canadian Border). Grand Forks, N.D. rng stn; Pembina, N.D. rng stn.
(56) Blue Airway #11 (Cleveland, Ohio, to Niagara Falls, N.Y.) No reporting point designation.
(57) Blue Airway #12 (The Dalles, Ore., to Ellensburg, Wash.). Yakima, Wash. rng stn.
(58) Blue Airway #13 (Houston, Tex., to Kansas City, Mo.). No reporting point designation.
(59) Blue Airway #21 (Pittsburgh, Pa., to Erie, Pa.). No reporting point designation.
(60) Blue Airway #23 (Detroit, Mich., to Flint, Mich.). No reporting point designation
(61) Blue Airway #28 (Charleston, S.C., to Spartanburg, S.C.). No reporting point designation.
(62) Blue Airway No. 30 (Brownsville, Tex., to Amarillo, Tex.). No reporting point designation.
(63) Blue Airway #31 (Burlington, Iowa, to Moline, Ill.). No reporting point designation.
(64) Blue Airway #32 (Seattle, Wash., to Fairbanks, Alaska). The intxn of the NW course of Seattle, Wash. and the S course of Patricia Bay, B.C.
(65) Blue Airway #47 (Martinsburg, W.Va., to Philipsburg, Pa.). No reporting point designation.
(66) Blue Airway #51 (Wendover, Utah, to Pocatello, Idaho). No reporting point designation.
(67) Blue Airway #52 (Paso Robles, Calif., to Fresno, Calif.). No reporting point designation.
(68) Blue Airway #53 (Providence, R.I., to Hartford, Conn.). No reporting point designation.
(69) Blue Airway #54 (Salinas, Calif., to Oakland, Calif.). No reporting point designation.
(70) Blue Airway #55 (Crestview, Fla., to Montgomery, Ala.). No reporting point designation.
(71) Blue Airway #56 (Elizabeth City, N.C., to Norfolk, Va.). No reporting point designation.
(72) Blue Airway # 57 (Elko, Nev., to Burley, Idaho). No reporting point designation.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Action Taken
Houlton, Me.	6-hourly	Discontinued
Greenwood, Miss.	6-hourly	Discontinued
Jasper, Fla.	6-hourly	Discontinued
Ft. Myers, Fla.	6-hourly	Discontinued
East Moriches, N.Y.	6-hourly	Discontinued
Dalhart, Tex. (Dalhart Arpt)	Hourly	To be available soon

NOTE: Hourly in lieu of SW reports will be available soon from 0600 to midnight from Fresno, Calif. (Fresno Air Terminal).

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

✓ AMENDMENTS TO PUBLISHED MINIMUM ENROUTE INSTRUMENT ALTITUDES:
Correct Minimum Enroute Instrument Altitudes, carried in the Flight Information Manual, dated August 1, 1948, as follows:

Airway:		From:		To:		Min.Alt.:
"	Green 1		Megantic, Me.	"	Millinocket, Me.	5000'
"	Green 3	"	Lucin, Utah	"	Ogden, Utah (E-bound)	11,000'
			Ogden, Utah	"	Lucin,Utah (W-bound)	9000'
"	Amber 7	"	Lock Raven, Pa. (Int.)	"	Boothwyn, Pa. (Int.)	1800'
			Boothwyn, Pa. (Int)	"	Philadelphia, Pa. (Int)	1800'
			Philadelphia, Pa. (SW)	"	Philadelphia, Pa. (NE)	1800'
	Direct Routes		Topeka, Kans.	"	Hutchinson, Kans.	2600'
	(NE United States)		Momence, Ill. (Int.)	"	Int.N course Terre Haute, Ind., & SW course Lafayette, Ind.	2000'
	Direct Route (SE United States)		Meridian, Miss.	"	New Orleans, La.	1600'

CEDAR CITY ARPT: Equip. on fld, daylgt hrs. (8-3)
DELTA ARPT: Trans acft use rnwys, taxi strips only. (4-19)
ENTERPRISE-RADIO: Soon, rdo rcvg facs, voice communs on all freqs will be discont for relctn of control quarters to Cedar City, Utah. (6-16)

[redacted]: HILL AFB (OGDEN)-RADIO: USAF grnd/air stn will transmit on and receive on addnl freq of 2862 kc until approx Sept 1. (6-25)
★MILFORD-RADIO: Correct bear and dist, VHF omnirng stn to Milford Arpt: 344°, 4 mi
MILFORD ARPT: Closed to trans acft (const). Unlgtd bldgs SE corner S of and adj to bcn twr. Three 25' poles E side N of new const. (4-22)
NEPHI ARPT: Closed to trans acft (const). (4-23)
PRICE-CARBON CO. ARPT: CLOSED (const) (5-3)
PROVO ARPT: Farming equip on non-landing areas intermittently. (4-5)
ROOSEVELT ARPT: Closed to trans acft (const) (4-23)
SALT LAKE CITY-RADIO: Soon, Layton FM on N course will be shut down (modification)
★SALT LAKE CITY ARPT NO. 1-RADIO: CAA ILS localizer and glide path will be shut down approx Sept 1 for relocation. (6-19) Aug 27, CAA ILS middle mrkr compass ltr comm See ILS page. FLD: Use only rnwys, taxi strips when wet-shoulders soft. Right traffic when winds from S,SE,E. Prevailing wind rnwy lgts operate ngts. N neon approach lgt lane to be shut down approx Sept 1 for relocation (6-19)
SALT LAKE CITY-SALT LAKE ARPT NO. 2: Use rnwys, taxiways only-shoulders rough. (3-23)
TREMONTON ARPT: Hazard 80' E of rnwy mrkd with red flags. (6-13)
★WENDOVER-RADIO: Correct bear and dist, VHF omnirng stn to Wendover AFB: 348°, 14.6 mi.
WENDOVER: Grnd firing to 45,000' 60 mi E, in Low Figt Strip area 0800 to 1800.
[redacted]: BARRE-MONTPELIER ARPT: Safety strips rough, use rnwys only. (7-8)
BENNINGTON ARPT: E/W rnwy closed (const). (4-27)
BURLINGTON ARPT: Vermont NG P-47's use NW/SE rnwy only. Use rnwys only-lgt acft taxi on sod to taxi strips. Parked acft N side E/W taxi strip. (2-20)
**CANAAN, BUNNELL FARM ARPT: New Fld. Lat 44-56-00, long 71-31-30. (4-1)
SPRINGFIELD-HARTNESS ARPT: Rnwys slippery when wet. (7-16)
SPRINGFIELD-SOUTH VERMONT FLYING SERVICE SEAPLANE BASE: CLOSED. (6-20)
SWANTON-AUSTIN ARPT: Const in progress N/S, and NE/SW rnwys, areas mrkd by yellow flags. (5-24)
[redacted]: ALEXANDRIA ARPT: Lgts prior req. (3-25)
ALEXANDRIA-BEACON FLD: Const on rnwys, unusable portions mrkd. (7-26)
BIG STONE GAP-POWELL VALLEY ARPT: CLOSED. (6-15)
BLACKSTONE-RADIO: At intermittent periods, reception on high freqs unreliable (hvy lcl interference) (5-18)
BLACKSTONE AFB: N/S, NE/SW rnwy lgts inop. E/W rnwy closed. Avoid SE side of NE/SW rnwy, bulges, rough. Unlgtd wind sock installed near inop tetrahedron. (6-13)
CHINCOTEAGUE NAAS: Closed 1700 to 0800 except on req with 2 hrs notice. Bcn operates ngts except during local ngt flying with VFR conditions. Bcn on during ngt flying in emerg or on req. IFR figt plans accepted only 0800 to 1630 Mon thru Fri except on holidays and on 2 hrs notice. Lgts being repaired-unreliable. Use rnwys, taxi strips only-soft shoulders, trenches along sides of rnwys and taxi strips. Pilotless rdo-controlled acft oper days Mon thru Fri. Other acft in vcnty use ctn. Equip on fld. Red rot bcn operates when fld closed. It also is turned on when fld under positive control for oper of rdo-controlled acft, target tows and similar hazardous opers. Rnwy 16-34 closed (7-14)
CULPEPER ARPT: Rnwys soft and muddy after rains, mrkd when closed or hazardous. (6-15)
DAHLGREN NAF PROVING GROUNDS: Except in emerg or on req (with 2 hrs notice) fld open only 0730 to 1615 Mon thru Fri. Off. figts must be cleared thru one of the following: NAS Anacostia, D.C.; NAS PatuxentRiver,Md.; NAS Norfolk, Va.; NAS Quonset Point, R.I.; Cape May CGAS, N.J.; Inyokern NAF, Calif.; NAF Torpedo Stn, Newport, R.I.; Naval Acft Factory, Philadelphia, Pa.; Cherry Point MCAS, N.C.; Quantico MCAS,Va.; Proving Grnds, Eglin AFB, Valpariso, Fla.; Langley AFB,Hampton, Va.; Wright AFB, Dayton Ohio; Aberdeen Proving Grnds, Aberdeen, Md.; Lakehurst NAS, N.J. (5-5) The importance of avoiding the Dahlgren danger area is emphasized by several near accidents recently during periods of danger area activation. Hereafter very definite steps will be taken to identify any fliers who pass over the area without permission.
**HAMPTON-PENINSULA ARPT: Three 209' obst lgtd twrs erected 5 mi SW (216° true) at lat 36-57-47, long 76-24-40. (8-10) Right traffic for take-offs and landings to SW (Newport News). (3-24)
**HOPEWELL ARPT: Correct Lat 37-18-45, long 77-13-30. (5-12)
LANGLEY AFB(HAMPTON)-RADIO: USAF rng inop. (6-7) FLD: Rnwy 2-20 closed. Rnwy 12-30 closed to all 4-engine acft (2-19)

[redacted]: LYNCHBURG-PRESTON GLENN ARPT: Use rnwys when wet. (2-25)
MOUNT VERNON: See special notice under District of Columbia.
NORFOLK NAS-EAST FLD: Pilots inbound IFR to NAS Norfolk from any direction other than via Green 6 obtain specific ATC instructions for figt within Norfolk Control area (25 mi radius) prior to entering this area. The aforementioned specific ATC instructions may be obtained from Chincoteague Rdo or Twr (0700-2400), Patuxent Rdo or Twr, Richmond Rdo, Weeksville Rdo (0700-1900), Elizabeth City Coast Guard Twr (0700-1900), Langley Rdo or Twr, Navy Norfolk Rdo or Twr, Norfolk Rdo or Twr. Tetrahedron lgtd but uncontrollable. Equip. on fld. No 100 oct fuel avail. To be closed from Sept 20 to Nov 20, 1948 for reconstruction of lighting sys. NAS Chambers will be open during daylgt hrs and VFR weather conditions for single engine acft and multi engine acft of the F7J,JRB, JRF,PBY5A and R4D type only. Chambers twr guarding and trans on former East Fld published twr frequencies during this period. (8-19)
OCEANA NAAS. Closed 1630 to 0800 except on req with 2 hrs notice. Fld lgts unreliable. Soft shoulders and trenches along sides of rnwys and taxiways. (6-25)
ORANGE CO. ARPT: Construction in progress, fld usable with ctn. (8-2)
★PULASKI-RADIO: Aug 16, VHF voice fac comm on 111.1 mc.
QUANTICO MCAS: Rnwy and taxiway lgts inop. Port flood lgts, emerg only. Const in progress. (8-17)
RADFORD ARPT: Closed to trans acft (const) (7-12)
RICHMOND: Elko Aux Fld 5 mi E of Byrd Fld is similar in design and layout to Byrd Fld, BUT RNWYS ARE UNSUITABLE FOR LANDING BY ACFT OF ANY TYPE. Care should be taken not to confuse the two flds.
★RICHMOND-RADIO: Aug 18, VHF voice fac comm on 111.1 mc. These data rcvd too late for Freq. and Identifier List.
RICHMOND-BYRD FLD-RADIO: Aug 13, glide path, OMK and MMK figt-checked and placed in cont oper for test and equip shakedown and will be comm about Sept 6th. Glide path transmitter lctd 400' NW centerline of NE/SW rnwy and 800' NE of SW end of rnwy. Freq 333.8 mc, glide path angle: 2.9°. Alt over OM 1370' MSL. Alt over MM 370' MSL.. OMK lctd 4.35 mi SW end of NE/SW rnwy. Freq 219 kc, ident. "R". MMK lctd 3574' SW of SW end of NE/SW rnwy. Freq 201 kc, elev 165' MSL, ident "W"
RICHMOND-HERMITAGE ARPT: CLOSED. (7-16)
RICHMOND-PARNELL ARPT: Const S end N/S strip, mrkd. NNW/SSE rnwy unusable, soft. (4-5)
ROANOKE-WOODRUM FLD: Equip adj all rnwys. (7-21)

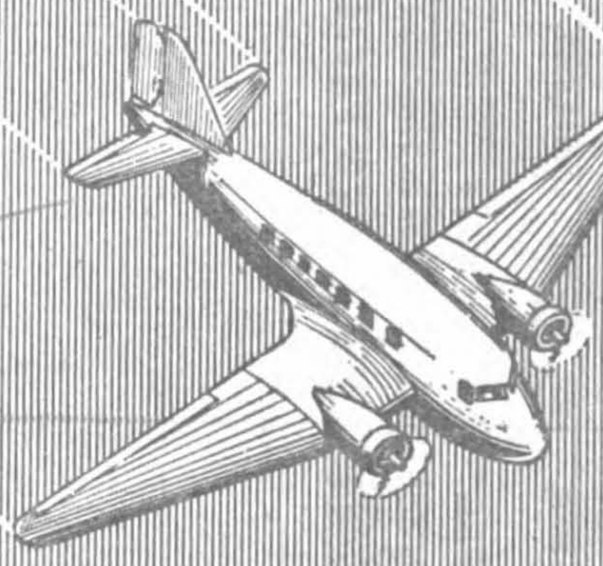
BELLINGHAM ARPT: Do not taxi off surfaced areas-sodded portions soft. Pilots of all unscheduled acft must register at the CAA Communs Bldg. Pilots of all scheduled acft using Bellingham Arpt as an alternate landing fld must register also. (2-3)
**BREMERTON-KITSAP COUNTY ARPT: South half NE/SW rnwy slopes. (4-21) Holes S half NE/SW rnwy. Do not taxi off surfaced areas sodded areas soft. (4-23)
BREWSTER-RIVERVIEW ARPT: Right traffic on ENE take-offs and landings. (3-25)
BUENA ARPT: Right traffic E take-offs and landings. (3-25)
CLE ELUM ARPT. Right traffic E take-offs and landings. Stay S of fld at all times (3-25)
COLLEGE PLACE-MARTIN FLD: Main rnwy under const. Use sod strip on S (4-12)
COLVILLE ARPT: CLOSED (const). (7-30)
ELLENSBURG-BOWERS FLD: Tetrahedron inop. (7-27)
EVERETT-PAINE FLD: Hangar under const S of parking area 500' W of present hangar, mrkd with red flags and lanterns. Ctn when taxiing this area. (4-19)
FORKS ARPT: Right traffic take-offs and landings to WSW (4-6)
GRAHAM-PUYALLUP ARPT: Right traffic N take-offs and landings. (3-25)
HOQUIAM-RADIO: Rng figt-checked June 27, N course 3°W, bear. 162°,E course 5° N, bear. 246°, S course 4° E, bear 343°. (6-29)
ISSAQUAH-SEATTLE SKY RANCH: Enter and leave traffic pattern NW of fld. (1-5)
KELSO ARPT: Seepage SW end of fld. (6-17)
**KENNEWICK-TWIN CITY SEAPLANE BASE: ABANDONED. (8-18)



[redacted]: KENT-Glider towing operations will be in progress in vcnty of Kent and over Kent Valley Until Approx Sept. 15, 1948. (8-20)
••KLIPSAN BEACH-OCEAN PARK SKY PORT: Caution-soft sand in spots. (3-12)
••LONGVIEW ARPT: New fld, lat 46-06-00, long 122-59-00. (5-28) Right traffic take-offs and landings ESE. (5-28)
MALOTT ARPT: Right traffic on E and ENE take-offs and landings. (3-25)
McCHORD AFB (TACOMA): Obst lgts on 2 antennas 5809' S of Rnwy 34, 1388' right of center line inop. Trees on approach to Rnwys 21-16. 1000' from Rnwy 21, and 1500' from Rnwy 16, ctn. (8-5)
METALINE FALLS-SULLIVAN LAKE ARPT: Before landing trans circle U.S.F.S. bldgs (adj to arpt) in effort to have vehicular traffic across landing strip temp stopped. (3-25)
••MOSES LAKE- Danger Area estab for air-to-ground gunnery and precision bombing over large area immediately SW of Moses Lake from the surface up to an unlimited alt. For use during daylgt hrs under VFR only. The area begins at lat 47-04-50 long 119-22, thence W to lat 47-04-50 long 119-51-30, thence SW to lat 47-02-20 long 119-55, thence S to lat 46-49-40 long 119-55, thence E to lat 46-49-40 long 119-22, thence N to lat 47-04-50 long 119-22, point of beginning.
MT. CATHERINE BCN SITE 4 SEA-HLN: Bcn inop. (8-23)
MT. VERNON OLF: Closed to all acft except those permitted by the C. O., NAS Whidbey Island. Training use rqrs 24 hrs advance notice thru Whidbey Island NAS. Bcn inop. (10-31)
OPPORTUNITY-LIMEN ARPK: Right traffic NE take-offs and landings. (3-25)
OROVILLE-DOROTHY SCOTT ARPT: Right traffic S take-offs and landings. (3-25)
PORT TOWNSEND-COUNTY-CITY ARPT: Right traffic E take-offs and landings. (3-25)
PULLMAN-MOSCOW ARPT: Equip. on fld. Soft spots and loose rocks on rnwy. (5-13)
PUYALLUP-S & S AIRSTRIP: Right traffic S take-offs and landings. (3-25)
REPUBLIC-FAIRWEATHER FLD: Right traffic NNW landings. All take-offs to SSE. (3-25)
RITZVILLE ARPT: NE end strip under const, mrkd. (5-12)
SEATTLE: Captive balloon oper for fog research from the N shore of Portage Bay, Seattle, approx midway between Lake Union and Lake Washington along ship canal. Balloon is 6' in diameter unmrkd and unlgtd with an instrument weighing approx 1-1/2 lbs suspended below and secured to launching reel. Balloon released to various alts up to 2000' any time day or ngt during formation and dissipation of fog in this area. (2-20)
SEATTLE-BELLEVUE AIRFLD: Right traffic when landing to S. (3-25)
SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to lgt plane strip E of main rnwy. Traffic patterns to the E at 1000'. Right traffic when taking off to NW. Flash. amber lgt on twr indicates right traffic for lgt acft. Left traffic when taking off from lgt plane strip to SE. All turns when taxiing off lgt plane strip made toward twr. Pilots using lgt plane strip avoid flying over main rnwy or approaches thereto. Lgt gun signals issued on final approach. Hvy acft use main rnwys, taxi strips only, making traffic pattern W of fld at 1000'. Avoid flagged area E side of strip. Equip. on fld. (6-11)
SEATTLE NAS: Single-engine acft approach from Kirkland 1500' descending to 1000' over the stn. Rnwy 14-32 lgtd 30 minutes prior to arvls and dptrs between sunset and sunrise and on req. (2-20)
••SEATTLE-NORTH SEATTLE ARPK: New fld, lat 47-45-00, long. 122-15-00. (8-16)
SEATTLE-TACOMA ARPT: 2-way rdo rqrd for practice landings. Equip. on fld. (8-28)
••SNOHOMISH: N/S rnwy used only for landing & take off to S. (7-7)
SPOKANE AFB: Rnwy 16-34 closed, repairs. (7-9)
★SPOKANE-FELTS FLD-RADIO: Effect Aug 15, traffic will be controlled by lgt signals only. FLD: Rot. bcn atop Admin Bldg S side fld commissioned Aug. 28, 1948. (8-29) Lgt non-rdo equipped acft use mrkd graded area S of main rnwy. Fancher Bcn near Felts Fld inop. Take-off and land on sod area before reaching taxiway near center of fld. N side rnwy mrkd. Red flag displayed from twr days and flash. red lgt atop twr ngts indicates weather below VFR minimums. Use concrete rnwy only. Tetrahedron free swinging and should not be interpreted as traffic indicator. (8-14)
SPOKANE-GEIGER FLD-RADIO: About Sept 15, Felts Fld control twr facs will be comm. (8-13) FLD: Acft other than scheduled air carriers ctc Felts Twr for wind direction, velocity and rnwy in use before landing. Closed to acft not equipped with properly functioning two-way rdo capable of communs with Felts Twr. Rnwys 16,20,25 counterclockwise traffic. Rnwys 2,7,34 clockwise traffic. All take-offs and landings made on rnwy most nearly aligned with free swinging wind indicator except calm wind rnwy 34 which will be used when wind velocities are less than 6 MPH. (6-15) Filled ditch off E end E/W rnwy unfit. Obst lgts on top of flood lgts E end E/W rnwy inop. Glide path mast extending 30' above grnd, lgtd. Lctd 400' NW of NE/SW rnwy and 400' N of E/W rnwy. (6-18)

[redacted]: TACOMA-BARRY'S SKYHARBOR ARPT: Right traffic W take-offs and landings. (3-25)
TACOMA-CITY VIEW ARPK: CLOSED (const). (4-27)
TONASKET ARPT: Right traffic S landings and SSE take-offs and landings. (2-4)
VANCOUVER MUN ARPT: CLOSED. (5-30)

U. S. DEPARTMENT OF COMMERCE
CIVIL AERONAUTICS ADMINISTRATION
OFFICE OF [illegible]

GCA AVAILABLE: How and Where

ONTROLLED APPROACH (GCA) AVAILABLE TO CIVIL PILOTS AS WELL AS ARMY
ll GCA facilities (Air Force, Navy, or CAA) are available to any plane in emergency.
ssistance, pilots should first call the associated control tower.
the working frequencies listed below, Air Force and Navy GCA emergency VHF
made on 140.58 mc. Simplex service on 3117.5 kc will be provided at all Air
stallations to provide an alternate means of communications for scheduled air
Army towers will relay GCA instructions on 200-400 kc band to civil aircraft not equipped to receive VHF or HF. Most Navy and CAA GCA units can transmit instructions directly on tower low frequency. No AF units can transmit directly on tower low frequency. Those installations not suffixed by (&) can relay directions on tower low frequency.

A minimum of 30 minutes will generally be required to assemble a GCA crew and prepare the equipment for operation AFTER an alert has been received at those locations not providing continuous service. CAA GCA units, however, operate continuously. Pilots desirous of making practice GCA approaches should make their own arrangements with the tower concerned.

N.B. AF and Navy facilities are available to civil aircraft in emergency or by prior arrangement with the C.O. of the respective AFB, NAS or MCAS. Civil minimums established by the CAA are 400' ceiling and 1 mile visibility except in emergency.

(A)= Air Force Facility. G.P. = Glide Path. (L6) = High Intensity Lights. (W) = Without voice. (&) = On test basis, unmonitored and not to be used for navigation.
MMK's, OMK's are at the same locations as the middle and outer markers unless otherwise specified.

(9-14-48)

TRANSMITTING FREQUENCIES AND IDENTIFIERS

It must be remembered that practically all VHF omni-directional ranges (VOR) have not yet been formally commissioned and a great number of the VHF visual-aural ranges (VAR) are in the same status, being on test basis and not to be used for navigation. These on-test basis VHF ranges are indicated by a prefixed asterisk (*) in the following tabulation. (See Page IX for additional facilities)

LEGEND: * = Test basis-not to be used for navigation. (U) = Unmonitored, but usable for navigation. R = Low frequency range. VAR = VHF visual-aural range. VOR = VHF omni range.
H = Non-directional Radio Beacon (homing). T = Tower. - = Voice on 111.1 but not on 116.1 mc. + = voice on 111.1 and 116.1 mc.
T(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic.

VAR Monitoring Classification for Air Traffic Control Purposes: Category I = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. N.B. Category I indicated by parenthetical (1). Category II = If all except (D) of the conditions of Category I are met. N.B. Category II indicated by parenthetical (2). Category III - If facility monitored solely through use of an automatic visual course monitor and automatic transfer unit. Normally, VAR's which are not controlled by an INSAC and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. N.B. Category III indicated by parenthetical (3).

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(When city and airport names are identical, the airport name is omitted in the interest of space-conservation)

(A) Airport name* (with A in Type column) - Owned or leased totally by U.S. Air Force
(N) " (with N in Type column) - Owned or leased totally by Navy
(CG) " (with CG in Type column) - Owned or leased totally by Coast Guard
(NG) " (with NG in Type column) - Owned or leased totally by National Guard

(A) Airport name - Open to civilians but owned or leased wholly or in part by U.S. Air Force, Air Reserve, U.S. Air Force servicing detachment or contract gas usually available.
(N) " - Open to civilians but owned or leased wholly or in part by Navy
(CG) " - Open to civilians but owned or leased wholly or in part by Coast Guard.
(NG) " - Open to civilians but owned or leased wholly or in part by Army or State Government for Air National Guard. Limited servicing and maintenance for transient military aircraft.
(P) " - Civil airport open to military aircraft. (See Note 2).
* " - C.A.A. Int. Field, open to mil acft

* Air Force and Navy fields are listed alphabetically by airport name followed by city name in parenthesis.

N.B. ALL AIRPORTS EXCEPT THOSE CITED WITH AN "A" or an "N" IN THE TYPE COLUMN ARE OPEN TO CIVIL FLIERS. AIRPORTS WITH NO PREFIX ARE EXCLUSIVELY CIVIL AIRPORTS.

TYPE

A	- U.S. Air Force	I	- Intermediate	NG	- National Guard
C	- Commercial	M	- Municipal		
CG	- Coast Guard	N	- Navy	P	- Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified.

CLASS

(See Level Runway and Strip Requirements)

Class	Strip Length	Runway (Paved) Length
S-1	Less than 1800'	Less than 1800'
1	1800-2699'	1800-2499'
2	2700-3699'	2500-3499'
3	3700-4699'	3500-4499'
4	4700-5699'	4500-5499'
5	5700-6699'	5500-6499'
6	6700-7699'	6500-7499'
7	7700-8699'	7500-8499'
8	8700-9699'	8500-9499'
9	9700' +	9500' +

N.B. Length (of longest runway) minus one-quarter of airport elevation equals effective sea level length.

RUNWAYS

In "longest" column is stated length of longest landing area in hundreds of feet. No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

h. - landing area is hard-surfaced or paved
aw - allway field.
(26) - runwy or strip length not verified by CAA

FACILITIES AND SERVICING

RADIO

R: Incomplete radio facilities (with voice availability), such as ILS, or tower and ILS only.
R1: Control tower voice
R2: Range (or H facility) with voice
R3: Range (or H facility) and tower
R4: Range (or H facility), tower, and ILS

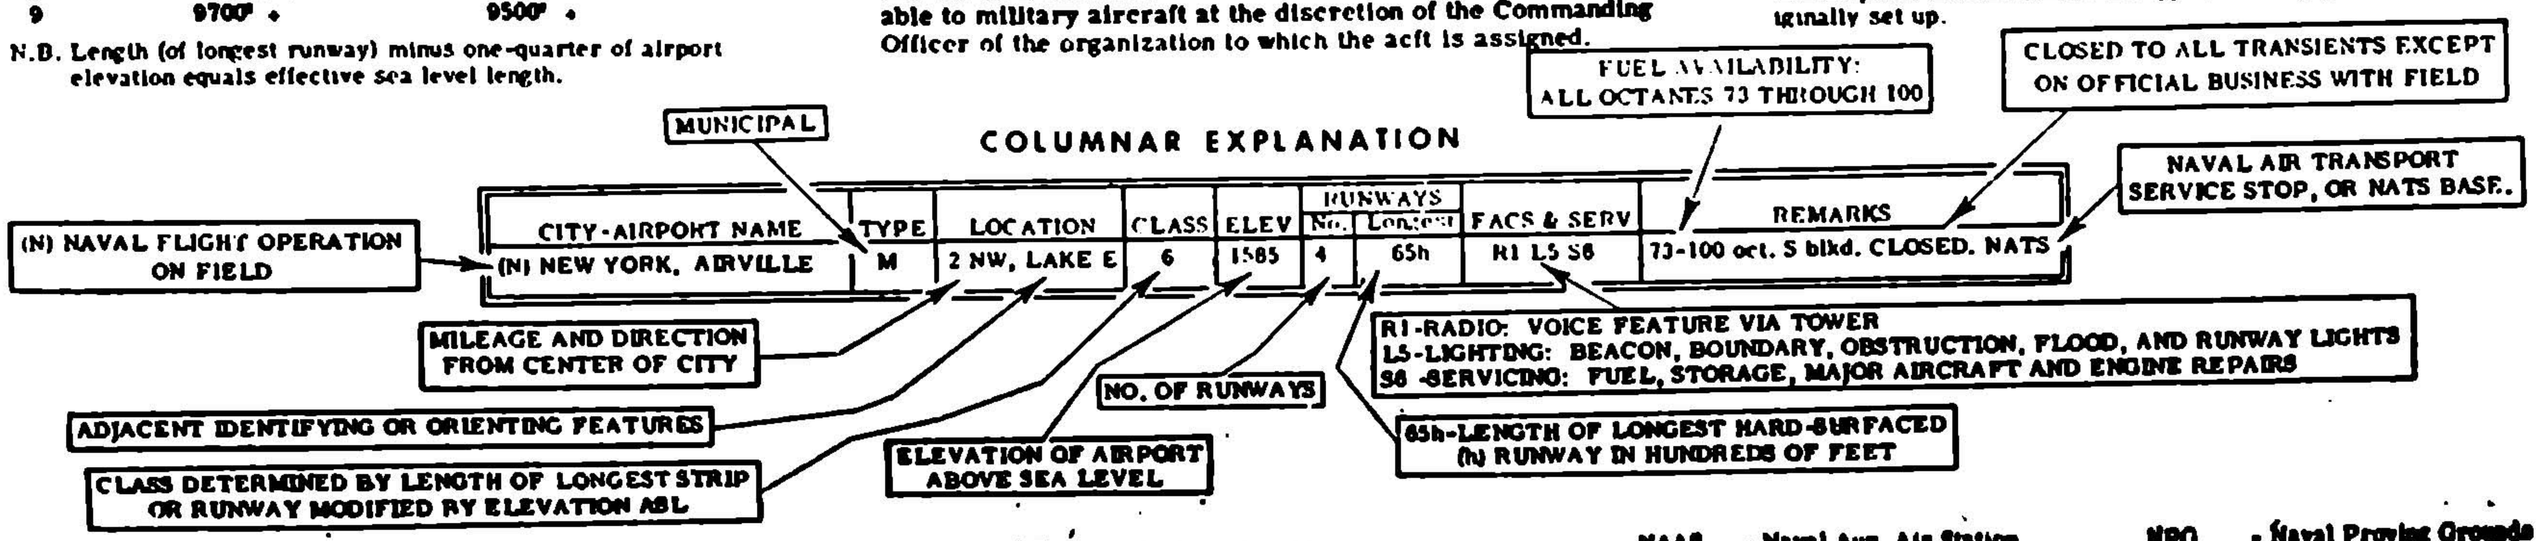
LIGHTS

L: Incomplete lighting, such as flood or strip lights, generally available only on prior request
L1: Rotating beacon only.
L2: Beacon and boundary
L3: Beacon, boundary, and obstruction
L4: Beacon, boundary, obstruction, and flood
L5: Beacon, boundary, obstruction, flood, and runway
(L5): Identical to L5 except rnwy lights are high intensity
L6: Beacon, bndry, obst, flood, rnwy, and instr appch
(L6): Identical to L6 except that appch lgts are high intensity
(The class always indicates the highest element available but does not necessarily include all intermediate elements)

SERVICING

S1: Fuel
S2: Fuel, storage (Any S combination in parenthesis indicates only part time or irregular attendant)
S3: Fuel, storage, minor aircraft repairs
S4: Fuel, storage, minor aircraft, and minor engine repairs
S5: Fuel, storage, major aircraft, and minor engine repairs
S6: Fuel, storage, major aircraft, and major engine repairs

REMARKS



(a) "91 oct" indicates fuel octanes available. "AF" or "Navy" preceding octane indicates USAF or Navy contract fuel available
(b) "CLOSED" indicates closed to all civil aircraft and all transient military aircraft except on official business with written orders this station or in emergency. "CLOSED MIL" and "CLOSED NAVY" on civil fields indicate same restrictions as above are applicable to armed services.
(c) "Port. B-2 lgts" indicates cone-mounted lights outlining runways. These lights are portable and may be shifted from runway to runway, or strips.
(d) "INACT-NO FACS." indicates USAF and/or Navy airfields used either exclusively by them or municipal airfields used jointly by them and civil interests at which both the USAF and/or the Navy and the civil interests are inactive. Such airfields will be available to military aircraft at the discretion of the Commanding Officer of the organization to which the acft is assigned.
(e) "USAF and NAVY INACT. CIVIL FACS." indicates municipal airfields used jointly by the USAF and/ or Navy and civil interests at which the USAF, or Navy facilities are inactive but civil facilities are available. Such fields may be used by military aircraft, however, only commercial service is avail.
(f) OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, clearly discernible for contact operations, are frequently omitted, for example. On the other hand, all pole lines within at least a 15-1 glide angle are indicated.
(g) "Bcn and/or fld lgts on req" indicates lights are available only by previous phone call, telegram, or letter. It must be remembered that most fields do not have 24-hour operation. Accordingly the lights, indicated for such a lighted field, (and in some instances, even the rotating beacons) are available only by prior request. When an airport classification indicates a lighted field, and there is no notation in the REMARKS column, the lights burn all night or will be turned on when a radio request is made or a plane circles the field.
(h) "FEE" indicates landing charges for revenue producing aircraft.

NOTES

1. —Notam data revising previous issues.
2. "(P)" in City and Airport Name column indicates: (1) those municipal airports improved with public funds and covered by an agreement between the municipality and the U.S. Government permitting government planes to use such fields in common with others and without charge, to the extent possible without restriction of non-military operations, or (2) other civil airports for which legal permits covering their limited use by military aircraft have been procured and filed with the real estate agency of the Department of the Army. If avail, contract fuel is noted in remarks column.
3. "*Effingham, 10, STL-IND in City and Airport Name column indicates that the airport is Effingham CAA Intermediate Field, Site 10 on the St. Louis-Indianapolis Airway. Municipal airports where the lights are maintained by the C.A.A. are listed similarly except that there is no prefixed star.
4. AIRLINE STOP airport names are capitalized.
5. PRIVATE AIRPORTS are available for owner only, and not to be used by others except in emergency. Since no servicing is available for transients no "S" combination is ever assigned these fields.
6. "BLKD" indicates approaches where glide angle to runway is 3:1 or less.
7. "(Formerly Air Force)" or "(Formerly Navy)": These former Air Force and Navy fields are in the process of being disposed of by the War Assets Administration and Farm Credit Administration. Their type is difficult of determination currently and they should be used with caution as some, unable to be disposed of as airport property, are being diverted to agricultural purposes.

** At the end of each state, under the heading of NEW AIRPORTS, will be found, out of alphabetical alignment, all the new airports tabulated after the type for that page had been originally set up.

COLUMNAR EXPLANATION

AIRPORT NAME ABBREVIATIONS

AFB - U.S. Air Force Base
CGAS - Coast Guard Air Station
LTA - Lighter than Air
MCAS - Marine Corps Air Station
MCAAF - Marine Corps Aux. Air Facility
NAAS - Naval Aux. Air Station
NAF - Naval Air Facility
NAS - Naval Air Station
NPG - Naval Proving Grounds
OLF - Outlying Field (Navy)

NOTICES TO AIRMEN

SPECIAL NOTICES

AIR FORCES SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commander, Military Air Transport Service, Washington 25, D.C., ATTENTION: Flight Information Branch, Operations Division, Air Transport. Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded to the same address for submittal to Chief of Staff, USAF, as required. Restrictions in Air National Guard Fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. That Bureau will forward approved restrictions to the above address for publishing. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration.

In connection with the above the attention of all base operations officers is invited to AF Regulation 55-12 of February 20, 1948, subject, "Notices to Airmen", and to AF Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of AF Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of AF Regulation 60-8 of August 28, 1947, USAF aircraft with destinations listed below or returning therefrom to the Unites States will clear through the stations indicated: AFRICA AND AZORES - Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass. ALASKA - McChord AFB, Wash.; or Great Falls AFB, Mont. BERMUDA - Mitchel AFB, N.Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; Westover AFB, Mass.; or Fairfield-Suisun AFB, Calif. CANADA - Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D.C., Selfridge AFB, Mich.; or Westover AFB, Mass. CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA - March AFB, Calif.; MacDill AFB, Fla.; Kelly AFB, Tex.; or Brookley AFB, Ala. CARIBBEAN - Brookley AFB, Ala.; Kelly AFB, Tex.; or MacDill AFB, Fla. ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND - Washington National Airport, D.C.; or Westover AFB, Mass. NOVA SCOTIA AND NEWFOUNDLAND - Washington National Airport, D.C.; Westover AFB, Mass.; Selfridge AFB, Mich.; or Brookley AFB, Ala. HAWAII - Fairfield-Juisun AFB, Calif. EUROPEAN THEATER - Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D.C.; or Westover AFB, Mass.

V.H.F. CHANNEL ASSIGNMENTS: Following are USAF assignments:

CHANNEL	FREQUENCY	CHANNEL	FREQUENCY
A	116.1	H	134.10
B	126.18	U	108.3
C	137.88	V	108.7
D	140.58	W	109.1
G	137.70		

MINIMUM SAFE ALTITUDES ON AIRWAYS: Under USAF Regulation 60-16 and policy to USAF, minimum safe altitudes for flight along airways will be identical to those established by the Civil Aeronautics Administration. Action is being taken to amend pertinent USAF flight information publications to show these minimums.

IFR CLEARANCE MINIMUMS FOR CIVIL FIELDS: For IFR clearance to civil fields when minimum altitude over field is not shown on let-down chart contained in T.O. 08-15-3 or Pilots Handbook, USAF policy states that the 'REGULAR - DAY" minimum as shown in CAA Flight Information Manual will apply. Necessary action is being taken to amend all charts to show the proper minimums.

✓ AF CONTRACT FUEL LISTINGS: In the past, "P" fields have been given an "A" designation to indicate availability of AF contract fuel. In the future, "P" designations will not be changed, but information with regard to AF contract fuel will be shown in remarks column of directory only, and information with regard to ratings of gasoline will be given when available.

POLICY ON CONTROL TOWER PROCEDURE: In the interest of decreasing communications load, the practice of tower traffic controller requesting information from incoming aircraft on highest rank aboard will be discontinued. This information will be included in transmission of flight plan over Plan 62 facilities. Other essential information not normally included in flight plan, such as indicating VIP's, will be noted in remarks column and similarly transmitted.

UNAUTHORIZED USE OF VHF EMERGENCY FREQUENCY (140.58 MC): The attention of all operations officers and pilots is invited to AF Letter 100-31, of January 13, 1948, subject as above.

DIRECT PILOT TO WEATHER FORECASTER COMMUNICATIONS SERVICE: Direct radio communication between military pilots and AWS weather forecasters is provided at locations and on frequencies given below. This service should be used only for those emergency occasions when the pilots consider direct communication with the weather forecaster is necessary for procurement of special weather data. In normal cases the weather sequences available from Airways Stations and Radio Range Stations is considered adequate.

Procedure: Establish contact with the Military Airways Station on the appropriate frequency and request connection to the weather forecaster:

LOCATION	FREQUENCY (VHF)
Langley Airways, Langley AFB	C
Tinker Airways, Tinker AFB	CAD
March Airways, March AFB	C
Barksdale Airways, Barksdale AFB	C

✓ CORRECTIONS AND CHANGES TO USAF A.N. 08-15-1: (1) Correct page 11, Chart Legend and Information, by changing as follows: Fan marker at left of diagram should be shown with identification of one dash; elliptical fan marker in approximate center of diagram with identification of two dots and four dashes; and bone shaped fan marker on W course of range at extreme right of diagram with identification of four dashes. This will conform to standard identifications for fan markers at these locations.

(2) Correct page 65, by showing arrow as denoting Military Airways Station at Tinker AFB.

(3) Correct page 107, by showing Egmont Key on X-Band Radar Beacon Chart Code as 1-2-2, and by showing Elizabeth City on X-Band Radar Beacon Chart Code as 2-2-1-1.

(4) Correct page 111, by showing Eglin AFB, Fla. on VHF D/F Coverage Chart.

(5) Correct page 72, under Cherry Point MCAS, N.C., by substituting control tower frequency 6970 kc for 6790 kc.

(6) Correct Canadian data as follows: (a) Rivers, Man.-RCAF gnd/air VYF oper 0700-1900 Mon thru Sat. Control twr operates 0700-1900 Mon thru Sat; on 4 hours req all other times. (b) Page 2, Patricia Bay, B.C.-Class of radio range: SBRAZ; (c) Page 4, Cowley, Alta.-Bear. and dist, stn to field: 338°, 3.5. (c) Page 22, Muskoka, Ont.-Class of radio range:

✓ Indicates new or revised Special Notices

BRAZ; (d) Page 26, Dartmouth, N.S.-Control twr now guards Channels B(9) and D.

CHANGE FOR T.O. 08-15-3: Change Greater Pittsburgh procedure by showing alt over range station on final approach as 1900'.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators No. 9, July 29, 1946, Hydrographic Office information concerning naval and marine corps air stations and facilities, including changes in field facilities, operation rules, air/ground communications facilities, instrument approach procedures and navigational aids, should be directed to: The Division of Air Navigation, Hydrographic Office, Washington 25, D. C., for transmittal to the CAA.

In accordance with Aviation Circular Letter No. 96-46 of June 13, 1946, approval for the closing of any naval or marine corps air station or facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations. Also, approval is to be obtained from the Chief of Naval Operations before relocation or modification of any aid to air navigation, such as reorientation of radio ranges.

V.H.F. CHANNEL ASSIGNMENTS: To standardize the frequency and channel set-ups for VHF equipment in naval aircraft, the following assignments became effective July 1, 1948, unless otherwise directed by authorized commanders:

CHANNELL	FREQ. (MC)	PURPOSE	CHANNEL	FREQ. (MC)	PURPOSE
A(1)	116.1	CAA Stations	5-F		Tactical
B(2)	142.74	Navy Towers	6-G	143.64	GCA
C(3)	137.88	USAF Airways	7-H	142.02	GCA
Guard-D	140.58	Emergency	8	134.64	GCA
4-E		Tactical	9	126.18	USAF Towers

RESTRICTIONS ON NAVAL AIRCRAFT AT LA GUARDIA FIELD, N.Y., NEW YORK INTERNATIONAL (IDLEWILD) AIRPORT, N.Y., AND NEWARK ARPT, N.J.: La Guardia Fld, N.Y., New York International (Idlewild) Airport, N.Y., and Newark Arpt, N.J., are closed to all naval air traffic except that involving urgent official business which cannot be properly handled by landing at Floyd Bennett Field.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout of servicing, lighting, or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety view point than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous conditions, reporters should utilize the CAA Airways Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Federal Airways, Attention: A-45, Department of Commerce, Washington 25, D.C.).

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate CAA District Airport Engineer for coordination before they are included in the Airman's Guide.

DIRECTORY OF AIRPORT NOTAMS: Because of space limitations, the airport directory perforce serves as a notam supplement. Notam data revising previous directory issues are indicated by prefixed arrows. The only airport data (other than temporary conditions) carried in the Notices to Airmen section are coordinates (latitude and longitude).

ACKNOWLEDGMENT OF SUBMITTED AIRMAN'S GUIDE DATA: An under-manned staff prevents an individual acknowledgment of data submitted for inclusion in the Airman's Guide by telegram, teletype dispatch, or letter. Your cooperation in permitting a Guide citation to suffice as an acknowledgment will be appreciated.

CIVIL USAGE OF MILITARY FIELDS: USAF and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

CIVIL USAGE OF MILITARY GCA UNITS: Navy and Air Force GCA units may be used by civil fliers in emergency or by prior arrangement with the C.O. of the fields having such units. CAA-established civil ceiling and visibility minimums of 400' and 1 mile respectively are mandatory, except in emergency.

AIRPORTS NOT TYPED AS "A" or "N" OPEN TO CIVIL AIRCRAFT: Air Force aircraft are restricted to their own fields, CAA intermediate fields, and to those civil airports prefixed by an (A), (N), (NG), or (P) in the Directory of Airports section.

Civil airports prefixed by (A) or (NG) have an Air Force or National Guard servicing detachment thereon. Those prefixed by (N) have a Navy (Air) servicing detachment thereon. Those prefixed by (P) have no such servicing detachments but are open to National Defense (Air Force, Navy, Army, Coast Guard) aircraft.

Under the present Air Force expansion program, the Air Force is activating or reactivating such servicing detachments on a number of civil airports. Such installations on previously (P)-prefixed airports will occasion a prefix change from (P) to (A).

N.B. Unless an airport carries an "A" or an "N" in the type column, it is open to civil aircraft. All airports with no prefixes are exclusively civil fields.

V.F.R. FLIGHT PLANS: The CAA urges you to file a flight plan prior to conducting a VFR cross-country flight. A flight plan may be filed with an Airway Communications Station or with a Weather Bureau Airport Station. Once you file a flight plan, follow it! When you land, close it with the nearest CAA communications station. VFR flight plans are handled for the primary purpose of enhancing search and rescue operations. So if you fail to close a flight plan you will become a false search and rescue incident and you may thus deprive someone who really needs assistance from getting it.

RE-ACTIVATION OF DANGER AREAS: Many new danger areas are being activated and the activity of existing ones is being intensified. Several recent near-accidents and

complaints from Army, Air Force, and Navy installations about danger area violations serve to re-emphasize the importance of avoiding such areas.

With the cessation of war the majority of danger areas could be, and were, entered or flown over with impunity. Today this is no longer the case. Do not enter a danger area without prior permission! Be sure your charts spot all new areas!

PROCEDURE FOR INDICATING TEMPORARY LANDING AREA HAZARDS AT CAA INTERMEDIATE FIELDS:

(a) When entire field is unsafe two red flags (days) and red double flashing warning lights (nights) will be prominently displayed from opposite corners of the beacon tower platform.

N.B. All normal field markings, boundary approach, obstruction lights, etc., will remain unchanged and will be lighted as usual.

(b) When a portion of the field is unsafe, 2 red flags (days) and red double flashing warning lights (nights) will be displayed from opposite corners of beacon tower. The usable landing area will be outlined with red flags and white lanterns with two white flags and two green lanterns at each end of usable runway indicating best approaches. The remainder of field (unusable portion) will be spotted with red flags. All normal field markings, boundary, obstruction, etc., will remain unchanged except green approach lights will be replaced with red approach lights.

(c) When a small portion of the field is unsafe, two red flags (days) and double red flashing warning lights (nights) will be displayed on opposite corners of beacon tower. Red flags and red lanterns will outline hazard area with several red flags and red lanterns within area.

(d) When one runway is unsafe, two red flags (days), two red lanterns (ngts) will be displayed from opposite corners of beacon tower. The unsafe runway will be marked off from remainder of field by a row of red flags and a row of white lanterns with red flags and red lanterns spotted in unsafe area. Green lanterns will mark approach to shortened safe runway with normal green approach lights changed to clear. The green approach lights of unsafe runway will be replaced by red.

S.C. 31-"AIR TRAFFIC CONTROL": Copies of Radio Technical Commission for Aeronautics Special Committee 31 Report, "Air Traffic Control", are available at the RTCA Secretariat, Room 597, Old State Department Building, 17th and Pennsylvania Avenue, N.W., Washington 25, D. C.

FLIGHT INFORMATION MANUAL, NEW ISSUE: The August 1, 1948, Flight Information Manual is now available and will be sent to all subscribers to the Airman's Guide.

✓ FLIGHT INFORMATION MANUAL AMENDMENTS AND CORRECTIONS: Correct the August 1, 1948, Flight Information Manual as follows:

(1) Correct Chapter V, Overseas Foreign Aeronautical Communications Stations (OFACS) as follows: Page 81, under San Francisco, KSF, delete transmitting and receiving frequencies 4595 and 8200 kc, and add 5145 kc. in both columns under "U.S.-Hawaii Route (Military)". Delete transmitting and receiving frequency 116.1 mc. and add 126.7 in both columns under "Voice, Local and Short Range". Under 3380 (Transmitting), add 12824 (daytime only), delete 3380 under Receiving. Under "Remarks", correct CW weather broadcast to read "On 3380 and 12824 (daytime only) plus all route freqs in use". In list of Surface Weather Reports, add McClellan Field following Fairfield.

(2) Correct Chapter II, Airport Index with Location Identifiers as follows: Page 26, add Talbert Airport, Fayetteville, W. Va.

(3) Correct Chapter XV, Instrument Approach Procedures as follows: (a) Page 204, under Norfolk, Va., Norfolk Arpt, correct ceiling and visibility minimums column to read R,S,A,T, from top to bottom. (b) Page 212, under San Francisco, Calif., San Francisco Arpt, correct bear. and dist, stn to airport to 291°, 3.2 mi.

✓ A.T.C. AREA BOUNDARY REVISIONS: On September 15, 1948, the following A.T.C. Area Boundaries will become effective:

(a) Between El Paso and Los Angeles: Red Civil Airway #9 - 25 mi. E of Yuma, Ariz.; Green Civil Airway #5 - 25 mi. E of Blythe, Calif.

(b) Between Albuquerque and Los Angeles: Green Civil Airway #4 - 25 mi. W of Needles, Calif.

(c) Between Albuquerque and Salt Lake: Red Civil Airway #15 - 40 mi. SE of Las Vegas, Nev.

(d) Between Albuquerque and El Paso: Red Civil Airway #15 - 25 mi. S of Prescott, Ariz. Red Civil Airway #9 - 25 mi SW of Winslow, Ariz.

✓ FLIGHT ADVISORY AREA BOUNDARY REVISIONS: On September 15, 1948, the following Flight Advisory Area Boundaries will become effective:

(a) Los Angeles - El Paso: To begin at a point on the Mexican Border at 114° 9' - 32° 18' and continue along a direct line projected across Red Airway #9 at a point 25 mi E of the Yuma Radio Range Station and across Green Airway #5 at a point 25 mi. E of the Blythe Radio Range Station thence to a point at 115° 3' - 34° 27'.

(b) Albuquerque - Los Angeles: To begin at 115° 3' - 34° 27' and continue along a direct line projected across Green Airway #4 at a point 25 mi W of the Needles Radio Range thence along a direct line projected to cross Red Airway #15 at a point 40 mi SE of the Las Vegas Radio Range.

(c) Salt Lake - Albuquerque: From a point on Red Airway #15 located 40 mi SE of Las Vegas Radio Range along a direct line projected to intersect a point at 112° - 36'.

(d) El Paso - Albuquerque: To begin at a point located at 115° 3' - 34° 27' and continue along a direct line projected to cross Red Airway #15 at a point 25 mi S of the Prescott Radio Range and Red Airway #9 at a point 25 mi SW of Winslow Radio Range thence along a direct line to a point on Amber Airway #3 located 25 mi S of the Engle Radio Range.

✓ NON-COMPULSORY REPORTING POINT: The intersection of the E course of Homestead, Fla. radio range and the SE course of the Miami, Fla. radio range, formerly carried as the "Fowey Intersection", has been changed to "SANDS INTERSECTION", due to the recent relocation of the Miami radio range, and the relocation of this intersection.

WEATHER REPORTING SERVICE

Weather Reporting Location	Type of Report	Lat., Long.	Elev.	Action Taken
Knapp Creek, N.Y.	3- and 6-hourly			Discontinued
Bend, Oregon	3- and 6-hourly			Discont.8-31-48
Kalispell, Mont.	3-hourly			Discont.8-31-48
Pampa, Tex.	Hourly & terminal forecasts			Discontinued
Arcadia, La.	6-hourly			Discontinued
Crown Point, N.M.	6-hourly			Discontinued
Frederick, Md.	Pibals	39-26,77-27	330'	To be available soon
Yuma, Ariz.	Pibals	32-40,114-36	203'	To be available soon
Ithaca, N.Y. (Cornell-Robinson Airport)	SW	42-29,76-27	1098'	To be inaugurated 9-10-48
Middleton, N.Y. (Orange Co.-Airport)	SW			To be inaugurated 9-10-48

Note: Hourly in lieu of SW reports to be available soon from Monterey, California.

✓ AMENDMENT TO PUBLISHED MINIMUM ENROUTE INSTRUMENT ALTITUDES: Correct Minimum Enroute Instrument Altitude, carried in the Flight Information Manual, dated August 1, 1948, Red Airway #68, Culbertson to the intersection of the E leg of Culbertson and the SW leg of Midland as 6100'.

TELETYPE NOTAMS: Throughout the year climatic conditions (snow storms, floods, etc.) render many fields temporarily unusable or unsafe. In addition, there are intermittent maintenance operations in progress on many fields. Radio facilities suffer temporary power failures or course misalignments, and lighting facilities are temporarily inoperative. Because these temporary conditions cannot be given immediate coverage in the "Airman's Guide", full cognizance must be taken of Teletype Notam service which gives the desired coverage on any facility or field at which teletype transmitting stations are based. Cross-country pilots, accordingly, should consult these Teletype Notams for latest available data on air navigation aids. These teletype notams are posted in CAA Communications Stations and in all Air Force Field and Naval Air Station Operations Offices having teletype drops.

AIRPORT AND RADIO NOTICES

LEGEND

•• - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.

★ - New or revised radio data to be inscribed on charts or added to records.

ALABAMA: BIRMINGHAM ARPT: Rdo rcvr rqrd days, transmitter and rcvr rqrd ngts. Sod unsafe when wet. Ctn ngts or under IFR, plant S of fld has long taxi and parking strips resembling rnwys. No signal equip. avail. to indicate that clearance is needed for VFR opers at ngt when weather below minimums. (7-8)

BROOKLEY AFB (MOBILE): Rnwy 9-27 closed. Acft parked on rnwy. Ctn, congested jet traffic. (8-24)

CRAIG AFB (SELMA): Equip. on fld. (7-19)

DOTHAN ARPT: Port. radar unit truck convoy and four 30' antenna masts at SW bndry, one mast obst lgtd. (8-25)

DOTHAN-NAPIER FLD: Obst lgts atop 175' water tank 6 mi N inop. (3-23)

FAYETTE ARPT: CLOSED (const) (8-31)

GAINSVILLE INT FLD: E/W rnwy avail, emerg use only. NE/SW rnwy under const, mrkd. (8-16)

JASPER-WALKER CO. ARPT: Avoid new strip-being graded. (7-8)

★MAXWELL AFB (MONTGOMERY)-RADIO: USAF X-Band radar bcn oper at lat 32-23-35, long. 86-21-41. Code: 2-1-1-2. (9-3) FLD: At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (10-17)

MOBILE-RADIO: Auto. rng monitor. sys inop. (9-3)

MOBILE-BATES FLD-RADIO: Approach control procedures will be comm at CAA twr Sept 15. (9-11)

MONTGOMERY-DANNELLY FLD: Use rnwys only. NW taxi strip closed. Const NW portion fld and along S side NW/SE loading ramp. 65' unlgtd control twr under const 65' SW of rot. bcn. (7-21)

TUSCALOOSA-FOSTER FLD: Spots of tall grass on fld. (8-23)

ARIZONA: CLEMENCEAU-COTTON WOOD ARPT: Eqtip. on fld, const. Rnwy 17-35 closed. Closed to ngt emerg. lndgs. (8-22)

DAVIS MONTHAN AFB (TUCSON): E fld closed-acft parked on rnwys. Former taxi strips 12R and 30L are now open as Rnwy 12R-30L, to be used by lgt acft days only. (5-18)

★DOUGLAS-RADIO: MRL fac comm Sept 10, at lat 31-30-19.8, long. 109-39-20.4. Freq. 379 kc, ident. "DUG". Courses: 50°, 120°, 230°, 300°. Var. 14°E. Bear. and dist, stn to fld: 120°, 3 mi. Rng figt-checked Sept 13. Class: BMRLZ-DT.

HOLBROOK INT FLD: Soon fld will be discont and thereafter the bcn, lgtd wind cone and bndry lgts will be installed and comm at the Holbrook Mun Arpt, 2 mi NNE. (6-7)

PHOENIX-SPECIAL NOTICE: Acft towing banner at alts between 1000 and 2000' over NNW section on Phoenix and cities of Glendale and Peoria, Ariz., between 0700 and 0800, and 1700 and 1900 daily for approx 30 days. Banner extends 350' behind acft. (8-27)

PHOENIX: Inst training on Phoenix Rng between 5500 and 9500'.

PHOENIX-SKY HARBOR ARPT: Ditch with dirt pile 100' E and 1000' N of S end N/S rnwy, mrkd. Parking ramp in front of term. bldg and E/W taxi strip under repair, mrkd. (8-12)

PRESCOTT ARPT: Use rnwys only, dirt badly eroded. (9-3)

ARKANSAS: ROOSEVELT-RADIO: Soon, special purpose 2-course VHF aural rng, privately owned will be comm on 110.7 mc, approx 10 mi W of Roosevelt at lat 33-41-00, long. 111-25-00. Call letters: "KAJE". Irregular hrs of oper, but chiefly during daylgt hrs. Freqs to be guarded 122.1, 122.5 mc, Stn not to be used for navigation, and is for experimental purposes only. (9-7)

TUCSON MUN ARPT: Const in progress. 2 to 3' banks of dirt along side of rnwys. Equip. on fld. (8-27)

WILLIAMS ARPT: New strip being const. Equip. crossing NE/SW strip. (6-14)

WILLIAMS AFB (CHANDLER)-RADIO: USAF rng unreliable and to be used for training only (2-3)

YUMA AUX NO. 1: E/W rnwy closed (fruit storage)(6-24)

YUMA AUX NO. 3: Macadam in piles along W side N/S rnwy. Width reduced to 1/2. (6-24)

ARKANSAS: BATESVILLE ARPT: N/S strip and E end E/W strip under const-unusable. Taxiway to fuel pump hazardous. (4-13)

••BENTONVILLE-STATE LINE ARPT: New fld. Lat. 36-00-00, long. 94-15-00. (8-24)

BLYTHEVILLE ARPT: NE/SW rnwy, open ngts. Green course lgts flash. 2 dashes. (7-1)

BRINKLEY ARPT: NE/SW and SE end of NW/SE rnwys hazardous when wet. Ctn ngts. (7-13)

★FT. SMITH-RADIO: Coordinates for VHF omnirng: lat 35-23, long. 94-16. (9-2)

FORT SMITH ARPT: Equip. E end E/W rnwy, mrkd. (8-14)

HARRISON ARPT: CLOSED. (7-6)

PINE BLUFF: Bombing practice being conducted 8 mi N within a circular area having a 3 mi radius, exclusive of Green Airway No. 5, centered at lat 34-21, long. 92-04. Acitivity began July 29 and will continue daily, Mon thru Fri., from 0800 to 1430, during VFR conditions only, up to 10,000', for a period of from 6 to 8 weeks. (7-30)

PINE BLUFF-GRIDER FLD: Use sod strips only, mrkd with alternate white and yellow mrkrs. Const on W and NW sides of fld. Closed ngts. (6-4)

★TEXARKANA-RADIO: Aug. 30, VHF omni rng placed in oper on unmonitored exper basis, not to be used for navigation. Freq. 117.1 mc, ident. "TXK". Stn lctn: lat 33-30-54, long. 94-01-30, Elev. 270' MSL, Var. 8°E. Bear. and dist, stn to Texarkana Arpt: 144°, 4 mi. Class: VORW.

CALIFORNIA: ALAMEDA NAS: Maintain high approach on Rnwys 26L and 21. Hvy acft parked these areas. 175' unlgtd cranes 2000' from NE corner fld-ctn ngts add during low visibility Equip. adj to and on rnwys. Fld on positive control. (2-20)

BAKERSFIELD-KERN CO. ARPT-RADIO: CAA ILS glide path shut down Aug 23 until about Sept. 23 (relctn) (8-24)

Hereafter very definite steps will be taken to identify any fliers who pass over the area without permission.
HAMPTON-PENINSULA ARPT: Right traffic for take-offs and landings to SW (Newport News). (3-24)
LANGLEY AFB (HAMPTON)-RADIO: USAF rng inop. (8-7) FLD: Rnwy 2-20 closed. Rnwy 12-30 closed to all 4-engine acft. (2-19)
LYNCHBURG-PRESTON GLENN ARPT: Use rnwys when wet. (2-25)
MOUNT VERNON: See Special Notice under District of Columbia.
NORFOLK-RADIO: VHF visual-aural rng flgt-checked Sept 2. Fac temp unmonitored.
NORFOLK NAS-EAST FLD: Pilots inbound IFR to NAS Norfolk from any direction other than via Green 6 obtain specific ATC instructions for flgt within Norfolk Control area (25 mi radius) prior to entering this area. The aforementioned specific ATC instructions may be obtained from Chincoteague Rdo or Twr (0700-2400), Patuxent Rdo or Twr, Richmond Rdo, Weeksville Rdo (0700-1900), Elizabeth City Coast Guard Twr (0700-1900), Langley Rdo or Twr, Navy Norfolk Rdo or Twr, Norfolk Rdo or Twr. Tetrahedron lgtd but uncontrollable. Equip. on fld. No 100 oct. fuel avail. To be closed from Sept 20 to Nov 20, 1948 for reconstruction of lighting sys. NAS Chambers will be open during daylgt hrs and VFR weather conditions for single engine acft and multi engine acft of the [redacted]: F7J, JRB, JRF, PBY5A and R4D type only. Chambers twr guarding and trans. on former East Fld published twr freqs during this period. (8-19)
★OCEANA NAAS-RADIO: Navy twr opers: 0800-1630 Mon thru Fri; or on 2 hrs notice.(7-26)
FLD: Closed 1630 to 0800 except on req with 2 hrs notice. Fld lgts unreliable. Soft shoulders and trenches along sides of rnwys and taxiways. (6-25)
ORANGE CO. ARPT: Const in progress, fld usable with ctn. (8-2)
QUANTICO MCAS: Rnwy and taxiway lgts inop. Port. flood lgts, emerg only. Const in progress. (8-17)
RADFORD ARPT: Closed to trans acft (const). (7-12)
RICHMOND: Elko Aux Fld 5 mi E of Byrd Fld is similar in design and layout to Byrd Fld, BUT RNWYS ARE UNSUITABLE FOR LANDING BY ACFT OF ANY TYPE. Care should be taken not to confuse the two flds.
★RICHMOND-BYRD FLD-RADIO: Sept 9, glide path, OMK and MMK facs comm on CAA ILS. Glide path transmitter lctd 400' NW centerline of NE/SW rnwy and 800' NE of SW end of NE/SW rnwy. Alt. over OM 1730' MSL. Alt over MM 370' MSL. Glide path angle: 2.9°.
**RICHMOND-CARRINGTON ARPT-New fld. Lat 37-39-00, long. 77-26-00. (7-20)
RICHMOND-HERMITAGE ARPT: CLOSED. (7-16)
RICHMOND PARNELL ARPT: Const S end N/S strip, mrkd. NNW/SSE rnwy unusable soft. (4-5)
ROANOKE-WOODRUM FLD. Equip. adj all rnwys. (7-21)
SHENANDOAH ARPT: Rnwy soft when wet. (6-15)
VIRGINIA BEACH-THALIA ARPT: CLOSED (const). (7-29)
[redacted]: BELLEVUE-LAKE ARPK: First turn at 600'. Take-offs to SSW. (1-5)
BELLINGHAM ARPT: Do not taxi off surfaced areas-sodded portions soft. Pilots of all unscheduled acft must register at the CAA Communs Bldg. Pilots of all scheduled acft using Bellingham Arpt as an alternate landing fld must register also. (2-3)
BREMERTON-KITSAP CO. ARPT: Holes S half NE/SW rnwy. Do not taxi off surfaced areas sodded areas soft. (4-23)
BREWSTER-RIVERVIEW ARPT: Right traffic on ENE take-offs and landings. (3-25)
BUENA ARPT: Right traffic E take-offs and landings. (3-25)
**CLARKSTON-ASOTIN CO ARPT Correct Lat 46-25-30, long. 117-03-00. (8-30)
CLE ELUM ARPT: Right traffic E take-offs and landings. Stay S of fld at all times. (3-25)
COLLEGE PLACE-MARTIN FLD: Main rnwy under const. Use sod strip on S. (4-12)
COLVILLE ARPT: CLOSED (const). (7-30)
ELLENSBURG-BOWERS FLD: Tetrahedron inop. (7-27)
EVERETT-PAINE FLD: Hangar under const S of parking area 500' W of present hangar, mrkd with red flags and lanterns. Ctn when taxiing this area. (4-19)
FORKS ARPT: Right traffic take-offs and landings to WSW. (4-6).
GRAHAM-PUYALLUP ARPT: Right traffic N take-offs and landings. (3-25)
HOQUIAM-RADIO: Rng flgt-checked Aug 28, E course 3° N, bear. 248°, S course 3° E, bear. 342°.
ISSAQUAH-SEATTLE SKY RANCH: Enter and leave traffic pattern NW of fld. (1-5)
KELSO ARPT: See page SW end of fld. (6-17)
**KENNEWICK-VISTA ARPT: Correct lat 46-13-15, long. 119-12-15. (8-30)
KENT-Glider towing opers will be in progress in vcnty of Kent and over Kent Valley until approx Sept 15, 1948. (8-20)
MALOTT ARPT: Right traffic on E and ENE take-offs and landings. (3-25)
McCHORD AFB (TACOMA): Obst lgts on 2 antennas 5809' S of Rnwy 34, 1388' right of center line inop. Trees on approach to Rnwys 21-16. 1000' from Rnwy 21, and 1500' from Rnwy 16, ctn. (8-5)
METALINE FALLS-SULLIVAN LAKE ARPT: Before landing trans (adj to arpt) in effort to have vehicular traffic across landing strip temp stopped. (3-25)
MT. CATHERINE BCN SITE 4, SEA-HLN: Bcn inop. (8-23)
MOUNT VERNON OLF: Closed to all acft except those permitted by the C.O., NAS Whidbey Island. Training use rqrs 24 hrs adv notice thru Whidbey Island NAS. Bcn inop. (10-31)
**NINE MILE FALLS-HILSEN AERO SERVICE SEAPLANE BASE: Landing area 10,000'. No svcg. (9-3)
OPPORTUNITY-LEMEN ARPK: Right traffic NE take-offs and landings. (3-25)
OROVILLE-DOROTHY SCOTT ARPT: Right traffic S take-offs and landings. (3-25)
PORT TOWNSEND-COUNTY-CITY ARPT: Right traffic E take-offs and landings. (3-25)
PULLMAN-MOSCOW ARPT: Equip. on fld. Soft spots and loose rocks on rnwy. (5-13)
PUYALLUP-S & S AIRSTRIP: Right traffic S take-offs and landings. (3-25)
REPUBLIC-FAIRWEATHER FLD: Right traffic NNW landings. All take-offs to SSE. (3-25)

[redacted]: RITZVILLE ARPT: NE end strip under const, mrkd. (5-12)
SEATTLE: Captive balloon oper for fog research from the N shore of Portage Bay, Seattle, approx midway between Lake Union and Lake Washington along ship canal. Ballon is 6' in diameter unmrkd and unlgtd with an instrument weighing approx 1-1/2 lbs suspended below adn secured to launching reel. Balloon released to various alts up to 2000' any time day or ngt during formation and dissipation of fog in this area. (2-20)
SEATTLE-BELLEVUE AIRFLD: Right traffic when landing to S. (3-25)
SEATTLE-BOEING FLD: All daylgt VFR opers of lgt acft confined to lgt plane strip E of main rnwy. Traffic patterns to the E at 1000'. Right traffic when taking off to NW. Flash. amber lgt on twr indicates right traffic for lgt acft. Left traffic when taking off from lgt plane strip to SE. All turns when taxiing off lgt plane strip made toward twr. Pilots using lgt plane strip avoid flying over main rnwy or approaches thereto. Lgt gun signals issued on final approach. Hvy acft use main rnwys, taxi strips only, making traffic pattern W of fld at 1000'. Avoid flagged area E side of strip. Equip. on fld (6-11)
SEATTLE NAS: Single-engine acft approach from Kirkland 1500' descending to 1000' over the stn. Rnwy 14-32 lgtd 30 mins prior to arvls and dptrs between sunset and sunrise and on req. (2-20)
SEATTLE-TACOMA ARPT: 2-way rdo rqrd for practice landings. Equip. on fld. (8-28)
SPOKANE AFB: Rnwy 16-34 closed, repairs. (7-9)
SPOKANE-FELTS FLD-RADIO: Traffic controlled by lgt signals only. FLD: Lgt-non-rdo equipped acft use mrkd graded area S of main rnwy. Fancher bcn near Felts Fld inop. Take-off and land on sod area before reaching taxiway near center of fld. N side rnwy mrkd. Red flag displayed from twr days and flash. red lgt atop twr ngts indicates weather below VFR minimums. Use concrete rnwy only. Tetrahedron free swinging and should not be interpreted as traffic indicator. (8-14)
SPOKANE-GEIGER FLD-RADIO: About Sept 15, Felts Fld control twr facs will be comm. (8-13) FLD: Acft other than sceduled air carriers ctc Flets Twr for wind direction, velocity and rnwy in use before landing. Closed to acft not equipped with properly functioning two-way rdo capable of communs with Felts Twr. Rnwys 16,20,25 counter-clockwise traffic. Rnwys 2,7,34 clockwise traffic. All take-offs and landings made on rnwy most nearly aligned with free swinging wind indicator except calm wind rnwy 34 which will be used when wind velocities are less than 6 MPH. (6-15) Filled ditch off E end E/W rnwy soft. Obst lgts on top of flood lgts E end E/W rnwy inop. Glide path mast extending 30' above grnd, lgtd. Lctd 400' NW of NE/SW rnwy and 400' N of E/W rnwy. (6-18)
TACOMA-BARRY'S SKY HARBOR ARPT: 353.5' obst lgtd twr being erected 1.7 mi W (278° true) at lat 47-15-13, long. 122-26-44. (9-1) Right traffic W take-offs and landings (3-25)
TACOMA-CITY VIEW ARPK: CLOSED (const). (4-27)
**TEKOA ARPT: Correct lat 47-13-30, long. 117-02-30. (8-30)
TONASKET ARPT:Right traffic S landings and SSE take-offs and landings (2-4)
VANCOUVER MUN ARPT: CLOSED. (5-30)
VANCOUVER-PEARSON ARPK: ESE/WNW strip under const. (4-8)
**YAKIMA: Large Danger Area approx 8 mi ENE has been rescinded and will hereafter be designated a controlled firing area with adequate notice being given to aviation interests in advance of firing activities.
[redacted]: CHARLESTON-KANAWHA CO. ARPT: Equip. on fld days. (7-28)
CLARKSBURG-PATTON FLD: Right traffic on landings to the S. (8-5)
PETERSBURG-RADIO: Aug 16, to Oct. 11, hourly weather observation will not be avail. for seq collection or radio bdcast during the hrs 2200 thru 0600 daily. (8-13)
WHEELING-OHIO CO. ARPT: Const N side W end E/W rnwy, mrkd. Equip. on fld days. (4-26)
[redacted]: **BUTLER-CURTISS-WRIGHT ARPT: 150' unlgtd twr erected 3.7 mi NNW (330° true) at lat 43-09-50, long. 88-04-15. (8-31) Closed ngts. (6-28)
EAU CLAIRE ARPT: Equip. on fld. Use rnwys only except in strong cross winds. (7-29)
**MADISON ARPT: Three 205' obst lgtd twrs Rdo Stn WISC erected 9 mi SSW (203° true) at lat 43-01-28, long. 89-23-53. (8-1) 98' unlgtd twr Rdo Stn WFOW erected 4.5 mi SSW (201o true) at lat 43-05-05, long. 89-21-12. (8-3) Equip. on fld days. Sod unsafe. (7-29)
MILWAUKEE-GENERAL MITCHELL FLD: Equip. on fld days. Right turn procedure rstd to locally based acft. New NNE/SSW rnwy 1-19 open days. Army twr lctd W side fld clsd and should not be confused with CAA twr lctd N side fld. N/S cinder strip avail. lgt acft only. Tetrahedron uncontrollable, free swinging. (8-3)

[redacted]: MILWAUKEE-MAITLAND AIR STRIP: CLOSED (const). (8-31)
RHINDELANDER ARPT: NE/SW rnwy closed (const). (8-9)
WAUKESHA CO. ARPT: Make first turns to left after landing and taxi on right side of strips to parking areas. Avoid landing or taxiing on soft area W side of N/S rnwy.(5-24)
WAUPACA ARPT: Fld under const. Old strips usable. Equip. on fld. (9-3)
WEST BEND ARPT: Const in progress. NW/SE rnwy closed. Narrow strip alongside NW/SE rnwy for temp use. (7-30)
[redacted]: CASPER AFB: All rnwy lgts inop, except Rnwy 3-21. Oil well drilling 4 to 5 mi NE. Ctn in using Rnwy 3-21. (7-22)
CASPER-WARDWELL FLD: Use rnwys, taxi strips only, bal fld rough. 40' unlgtd pole erected at 30 million candle pwr ceilometer pronector 1000' N of hangar. (2-17)
CHEYENNE-RADIO: Soon, lclzr and glide path of CAA ILS will be shut down for modernization. (8-24)
CHEYENNE ARPT: Equip. on fld. Use rnwys, taxi strips during wet weather-aboulders soft. (2-20)
LARAMIE BCN SITE 36, SLC-OMA: Soon CAA will discontinue maint and oper of bcn showing clear and green characteristic, and oper will be assumed by city. Bcn lctd, lat. 41-23.9, long. 105-40. (7-21)
LARAMIE-BREES FLD: Sod taxi strip running S from hangars closed. (4-22)
SHERIDAN CO. ARPT: N/S rnwy unsafe hvy acft. Taxi strips parallel all rnwys except N/S rnwy and terminate at ramp. Equip. on fld intermittently. (2-23)
SINCLAIR-RADIO: Sept 22, LF rng will be shut down for approx 1 day for realignment of E course to 251°. (9-9)
WHEATLAND-EASTSIDE ARPT: CLOSED (const.) (6-28)

AERONAUTICAL CHARTS OF THE U. S. COAST AND GEODETIC SURVEY

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Little Rock	Trinidad	WAC 404	FC 216
Roswell	Wichita	WAC 405	
Salina	WAC 362	San Diego local	

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION."

NEW EDITIONS

Beaumont	July 31, 1948.	FC 9	July 7, 1948.	AL 253	August 6, 1948.
Douglas	July 18, 1948.	AL 83	August 6, 1948.	AL 302	August 6, 1948.
Lake of the Woods	August 11, 1948.	AL 95	August 2, 1948.	AL 420	August 2, 1948.
New Orleans	August 15, 1948.	AL 151	August 2, 1948.	AL 436	August 6, 1948.
WAC 468	July 27, 1948.	AL 179	August 2, 1948.	AL 492	August 6, 1948.
WAC 470	July 17, 1948.	AL 198	August 6, 1948.	AL 552	August 3, 1948.
WAC 471	July 14, 1948.	AL 203	August 2, 1948.	AL 655	August 2, 1948.
WAC 522	July 25, 1948.	AL 204	August 6, 1948.		
22DF	July 19, 1948.	AL 224	August 2, 1948.		
Brownsville local	August 5, 1948.	AL 233	August 6, 1948.		
New York local	July 31, 1948.	AL 245	August 2, 1948.		

NEW CHARTS

OP 28	Augusta, Georgia	Daniel Field	August, 1948.
OP 321	Phoenix, Arizona	Luke Field	August, 1948.
OP 426	Bristol, Tennessee	Tri-City Airport	August, 1948.
OP 631	Fort Smith, Arkansas	Fort Smith Airport	August, 1948.
OP 643	Modesto, California	Modesto Airport	August, 1948.
OP 650	Wheeling, West Virginia	Wheeling-Ohio County Airport	August, 1948.

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional charts, price 25 cents each, should be ordered by name; World Air charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with the prefix (AL); Instrument Landing System Charts, 5 cents each, by number with prefix (ILS); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each, by number and with the suffix as in 22 DF; Local charts, 25 cents each, by name as Miami local; and Obstruction Plans, 40 cents each, by number with the prefix (OP). Consult the Dates of Latest Prints of Instrument Approach and Landing charts and Obstruction Plans for further information concerning these series of charts.

(9-14-48)

DATES OF LATEST PRINTS

U. S. Coast and Geodetic Survey

Aeronautical Charts

Dates in small type indicate minor changes which are not of sufficient importance to make the previous print obsolete. All charts carrying dates older than those shown in large type on this list are obsolete for use in flight.
